<p>1) In all cases, (except for Open Source components) binary distribution rights are limited to UNIX or UnixWare products. Definitions vary somewhat, but the intent is often to limit binary sublicensing to products substantially based on UnixWare.</p> <p>2) Veritas and Symbios source licenses are limited to support of UnixWare - e.g., OEM reselling UnixWare and wanting to provide customer support. We cannot license this source for any other purposes</p> <p>3) Binary distribution of our license manager does not make sense - it is of value only for our product, and for use with licenses sold by SCO</p> <p>4) Source code to the SGI NFB graphics driver can only be delivered for use in creating a product that is compatible with an SCO UnixWare Operating System.</p>
