

of Lucidas with mac apps could be a good selling point and a competitive advantage.

Class 4 is the 22 PS fonts to fill out the 35; GeorgeM is currently driving the contract with Monotype (all T&S'c are in place, just puttint it to paper remains). There are clauses to allow TrueImage and Windows to ship these fonts too, but it starts getting really expensive if we do. MikeMap, SteveB & BillG have bought in on this plan. Current plan is to ship with Word, PowerPoint (Mac & Windows) and Voodoo (Win only I think).

Steve, I've got the cascade room reserved on friday from 2-3pm for a BU meeting. I would really like to be there to give the Declaration of War speech. Can you do it -- the team really needs to hear directly from you!
