How does DRI have Win 3.1 in the FIRST PLACE????????????? They are
on the beta blacklist!!

Is the report from DR or a customer who is a beta tester of 3.1 who
also uses dr dos???

These guys need to know what they need to do to get
their memory manager to work in 3.1.

Dan- Do you know where we can get this info?

Thanks,
Steve

There is no loadhi VxD available for Win31 because that functionality
has been built directly into VMM. The old VxD should detect this and
not load on a 3.1 system, which is how it should be. So, it's hard
to say what problem they are having...

I do know that there were problems with QEMM in this area, but I'm
not privy to that information...

|
| Hey dude,
|
| A few months ago Neil helped DR with a Loadhi problem
| with Windows. Well, they got everything working for 3.0
| but now they say they break in 3.1. Can you find out if
| there's a new Loadhi we can ship?
|
| Thanks,
| Steve
|

There should be NO HELP for DRI. They are totally on their own.

Do we know if DR has Win 3.1? They are NOT an official beta tester.

OK, it sounded like you were referring to a follow up meeting on
schedules.

Have you met Mack McCauley yet? He's a great guy and will help
a lot. I'll bring him by to meet you.

you can buy the penpoint book at any book store. I got mine
at tower books. I can get you a copy of my memo.

We are not going to support DRI in the future either. Windows
works on MS-DOS and PC-DOS 3.1 and above.

the dos 5 upgrade accounted for 34% of the your June sell through and
you can't find time on the agenda for it??? weird.

we've already produced documents that discuss the competitive
situation with ibm and dri, and your sales people have already been
given it. everyone knows that face to face works better than
documents.

|
| The agenda is as usual jam packed. I have asked Rich
| to look at it one more time. We will sell the units...
| with or without the session. What we need is a good
| white paper that explains going against both IBM DOS and
| DR DOS.
|
| If we can find time at the NSM, I would be happy to get you on the agenda.
