This report was prepared with Word for Windows 7.0. All tables were created in Excel 7.0 and either embedded in the document or linked to master spreadsheets. Additionally, most of the channel and product group tables were generated via automation is on the general ledger. Each of these automated tables is made accurate in its calculations by using data at a lower level than the rounded amounts shown in this report. These lower level amounts are used to calculate variances and are then rounded and displayed in this report. Therefore, individual amounts are rounded perfectly but lotate and variances may not foot precisely. All other tables have individual numbers that may be rounded. While these individual numbers may not be precisely to supporting schedules, they will foot exactly as shown in this report.

(NOTE: Revenue is "net" unless otherwise stated. Gross revenue is net of returns.)

Q96-4 Highlights

- Net revenue reported externally was \$2.26 billion, an increase of 39% over the comparative quarter in FY95. For the year revenue grew 46% to 8.67 billion, from \$5.94 billion in the prior year. Year over year growth occurred across all product divisions with most notable increases in sales of Office and Office Pro, Windows 95, and the BackOffice suite of products including Windows NT. Unearned revenue related to operating systems and maintenance contracts totaled \$560 million at June 30, 1996.
- An estimated 35 million units of Windows 95 have been sold to end users since launch, with an estimated 10 million sold through the retail channel and about 25 million through the OEM channel.

- Cost of revenue as a percent of net revenue declined to 10.7% from 14.4% in Q95-4 mainly due to channel mix, more corporate licensing, and increased shipment of products on CD-ROM, which carry lower cost of goods than floppy disks.
- Research & development costs representing 20% of net revenue, grew 72% over the prior year's quarter, and 67% for the year. Increased R&D costs are reflected across all product divisions, particularly in Consumer, Microsoft On-line Services and Business Systems and is primarily driven by headcount related costs and third party development.
- Net income for the quarter totaled \$559 million, a 52% increase over Q95-4. Earnings per share increased 49% to \$0.87. For the year, EPS was \$3.43, a 48% increase over FY95. Other expenses include investments in MSNBC for \$22 million and \$5 million related to Dreamworks Interactive.

Notes to Consolidated Management Reports

The consolidated management P&L is based on functional responsibility and prepared in accordance with MAP (Microsoft Accounting Principles). These results do not include the impact of certain adjustments and reclassifications as required by Generally Accepted Accounting Principles (GAAP) for external reporting. Significant differences between financial statements prepared for internal management use and externally reported results include:

- Revenue for internal management reports is generally recognized "as billed." Under GAAP, net revenue includes adjustment for certain billed, but unearned revenue, such as a portion of operating system revenue that will be recognized over the product life cycle. Conversely, certain revenue that is earned but not yet billed such as unreported OEM and Select revenue is also recognized for external purposes.
- Q96-4 management reports reflect the final

- reversal of the Desktop 95 channel reserve, taken initially in Q96-1 and adjusted monthly since then. For external reporting, these reserves have been adjusted to reflect channel inventory in excess of normal levels with potential for return.
- For external reporting purposes, the net cost of MSN operations is included as research and development expenses until such time as MSN has profitable gross margins. For internal management reporting, MSN revenue and cost of operations are shown grossed up as a business channel.
- For external reporting purposes, all product marketing related activities are classified as a sales and marketing expense. For internal reporting purposes, product marketing departments and related marketing expenses are included in product development.
- Non-operating income, expenses, non-continuing items, and income taxes are excluded from internal management reports.

Gross revenue	<u> </u>	9,686.0	S	8.342.4	\$6,218.4	100%	116%	156%

- FY96 gross revenue was \$9.69 billion, 16% over of plan and 56% ahead of FY95. Year over year growth was primarily driven by strong sales of Windows 95, Office and Office Pro, and BackOffice products, particularly Windows NT which increased more than 280% or \$328 million. Q96-4 gross revenue adjusted for Desktop 95 reserves was \$2.23 billion, 33% ahead of plan with Office, Office Pro, Windows 95 and Backoffice products continuing their strong growth trends.
- Remaining Desktop Channel reserves of \$363 million were reversed in Q96-4 reflecting normal 6 week channel inventory levels in most subsidiaries.

HIGHLY CONFIDENTIAL

- FY96 Desktop Applications Division gross revenue totaled \$4.19 billion, 20% over plan and 35% over last year. Revenue from Office and Office Pro products totaled 78% of the total, growing 52% over FY95 and over plan by 29%.
 Q96-4 DAD revenue adjusted for reversal of Desktop Channel reserves totaled \$1.19 billion, 46% better than plan.
- Personal Operating Systems gross revenue for the full year totaled \$3.24 billion, 17% over plan and 95% or \$1.58 billion over FY95. Revenue from Windows 95 (excluding upgrade maintenance revenue) was \$1.78 billion for the year versus plan of \$1.66 billion. Gross revenue in Q96-4 adjusted for Desktop reserves totaled \$856 million or 41% better than plan.

ALTHOR: SCOTT BOGGS (SBOGGS)

MS-PCA 1192513 CONFIDENTIAL

- FY96 Business Systems gross revenue totaled S987 million, 73% over plan and 149% over FY95. Windows NT (servers, user licenses and workstations) generated over 51% of total BSD revenue. Business Systems revenue for the quarter was \$333 million, 90% over plan.
- Consumer division revenue of S828 million was 96% of plan for the year. Better than plan sales of Sidewinder Joystick, Mouse, Geo/Travel software and Works were offset by below plan sales of keyboards, Bob, Entertainment and Reference software. All products, with the exception of Bob,

Imaging and Personal software, had double digit year over year growth.

- MSDN and Visual Basic were the main drivers behind Developer division's 52% FY96 growth over FY95. Full year gross revenue totaled \$413 million, 13% over plan. Q96-4 gross revenue exceeded plan by 22% on revenues of \$94 million.
- FY96 Microsoft Online Services (or MSN) gross revenue was \$44 million, 48% of plan. MSN ended the year with more than 1.25 million subscribers.

- Net finished goods (FG) revenue for FY96 totaled S6.40 billion, 10% over plan and growing 51% over FY95. All regions finished above plan primarily driven by higher than planned sales of DAD products, particularly Office and Office Pro. Q96-4 FG revenue was \$1.72 billion, 32% over plan, and included \$363 million from the reversal of Desktop reserves.
- All major sales locations were above plan on a full year basis with the exception of France and Brazil.
 France was 98% of plan mainly due to lower than planned sales of Windows 95 and Brazil was impacted by local distribution problems. See Sales & Marketing section for additional detail.
- FY96 OEM revenue exceeded plan by 35% with revenue of \$2.65 billion driven primarily by continued strong worldwide PC growth and faster than planned conversions to Windows 95. Q96-4 OEM revenue exceeded plan by 45% with net revenues of \$739 million.
- MS Press revenue of \$78 million for the year was 96% over FY95 primarily due to strong sales of Windows 95 and Windows NT related titles.

Desktop 95 Channel Reserve

- Channel inventories of Windows 95 and Office 95 appear to be at normal levels in most countries.
 As a result, the Desktop 95 channel reserve has been fully recognized as revenue for internal manage-ment reporting purposes.
- The United States and a few countries in Europe have increased general sales returns reserves approximately \$33 million to reflect remaining exposure for Desktop 95 returns.

- For the year, shipments of Windows 95 and MS Plus! into the retail channel totaled \$1.277 billion. Of this, \$424 million, or 33% was returned for a net sell through of about \$853 million. Returns were highest in North America at about 39% while the Far East experienced returns of only 2%.
- Sell in of Office 95 and other 32-bit versions of DAD products totaled \$1.501 billion during the year with returns of \$297 million. or 20%. Net sell through totaled \$1.205 billion with North America having the highest level of returns at 32%, and Far East the lowest at about 3%.

License Mlx - Finished Goods

- Sales of full-packaged product (including upgrades) continues to decline rapidly, falling below 50% of total finished goods sell-in for the first time. Abnormal increase in FPP in Q96-1 reflects initial sell-in of Windows 95 and Office 95 into the retail channel.
- Revenue from Select licenses (including Select maintenance included in the "maintenance" category above) was \$421 million in Q96-4, about flat with Q96-3, but growing 48% over the same quarter last year. For the full year, revenue from all license programs including maintenance made up about 35% of total FG revenue.

Foreign Exchange Impact on Consolidated Net Revenue

in millions)	Q96-4 \	ariance vs	. Plan	FY96 Variance vs. Plan			
	Volume	FX	Total	Volume	FX	Total	
North America FG	S249.2	\$1.0	\$250.2	\$145.5	\$3.5	\$149.0	
	18.0	9.9	28.0	53.8	51.9	135.7	
Europe FG CON FG	32.8	4.4	37.2	21.7	7.6	29.2	
CON FG Far East FG	148.1	(43.1)	104.9	379.3	(110.8)	258.	
TEM, Other AT & Channels	211.3	0.0	211.3	671.1	0.0	671.	
Variance to plan	\$659.4	(\$27.8)	\$631.6	\$1,271.4	(\$17.9)	\$1,253.	

- The table shown above summarizes the impact of actual foreign exchange rates compared to plan for Q96-4 and year to date. Actual exchange rates compared to plan resulted in a net negative fx variance of \$28 million for the quarter and \$18 million for the year.
- The US dollar was weaker than planned against most major European currencies resulting in

positive revenue variance of \$82 million for the year and \$10 million for the quarter.

 A stronger than planned dollar-to-yen exchange prevailed in Japan, resulting in a S111 million negative foreign exchange variance for the year.
 During the quarter, the rate averaged 102 Yen per dollar compared to a budget rate of 90 Yen resulting in a S43 million loss.

Other (primarily MS Press)	0.4%	0.4%	99.8%	38.0%	110.5%
- ·	100.0%	13.9%	13.9%	15.4%	14.3%

- FY96 cost of revenue in the finished goods channel was 1.7 points better than plan due to a favorable mix of CD-ROM media (58% of total packaged product vs 37% planned) and licensed product sales (45% of finished goods revenue vs 36% planned), offset by S94 million inventory charges for Desktop 95 overbuild. The higher mix of CD-ROM media and licenses also contributed to the decrease in cost of revenue as compared to FY95.
- FY96 CD-ROM mix by division compared to plan and last year is illustrated in the following table:

	Actual	Plan	Prior Yr
Personal Systems	54%	21%	1%
Desktop Applications	44%	12%	8%
Consumer (software)	75%	55%	47%
Business Systems	60%	34%	41%
Developer	75%	25%	26%
Total	58%	37%	22%

- FY96 cost of revenue in the OEM channel was 1.6
 percentage points less than plan mainly due to the
 higher mix of revenue from software licensed
 products versus hardware.
- Cost of revenue across all product divisions with the exception of Consumer and MSN, were below plan primarily due to the shift to CD-ROM media and license sales. MSN cost of revenues was higher than plan primarily due to higher internet usage and contract settlements with British Telecom, AT&T and UUNet for changes in MSN strategy.
- Q96-4 cost of revenue was 12.3% versus plan of 15.7%. The lower than planned cost of revenues is driven primarily due to reductions in inventory reserves.

People cost per head	\$94,758	\$89,282	106%	\$87,758	108%
Infrastructure cost per head (annualized cost per average MS head)	\$29,082	\$29,334	99%	\$31,572	92%
Contingent staff and outsourcing (as a percentage of People costs)	37.0%	33.8%		21.6%	

- Operating expenses were 2% over plan for the year, with negative variances in contingent staffing, third party development and marketing. As compared to FY95, operating expenses grew 42%, less than revenue growth of 54%. However, contingent staffing, marketing and third party development all grew faster than revenue. Q96-4 operating expenses totaled \$1.253 billion, 30% over plan due to the same factors and expected spending to full year plan.
- For the year, people costs totaled \$1.71 billion, 4% below plan due to lower than planned headcount.
 Average cost per head was 6% over plan primarily due to accrued but not budgeted management and executive bonuses, and higher employee recruiting costs, particularly signing and relocation bonuses. People costs grew 8% over last primarily due to salary increases.
- Infrastructure costs for FY96 totaled S524 million, 10% below plan but 11% over FY95 driven by higher telecommunication costs which increased 40% to S97 million. On a per head basis, infrastructure costs were about as planned.

HIGHLY CONFIDENTIAL Full year contingent staff and outsourcing costs increased 124%, or \$350 million over last year. As shown below, outsourced PSS represented the most significant increase.

	FY96	FY95	Growth
PSS	\$221.8	\$76.0	192%
Product Groups	196.8	81.7	141%
ΠG	86.3	54.1	59%
Sales Groups	54.2	41.3	31%
MCS	44.2	2.1	2017%
G&A	_28.1	26.4_	7%
TOTAL	631.4	281.6	124%

- Third party development costs of \$292 million reflects unplanned acquisitions including Aspect and Colusa and the amortization of Intellectual Property Rights (IPRs) related to acquisitions such as Bruce Artwick and Funk & Wagnall
- Other expenses include bad debt. tax, and license expenses which are generally variable with sales volume.

- Full year product development costs totaled \$1.66 billion, increasing 54% over last year. Average product group headcount increased 40% to 6,784.
 Product marketing, contingent staffing and third party development costs increased across all divisions.
- Application and Content Group controllable expenses were \$644 million, 1% below plan for the year and 68% over the prior year. Growth over FY95 was primarily due to increased investments in Consumer and MSN headcount combined with increases in third party product development and localization costs.
- Platform Product group controllable expenses were S737 million or 4% over plan for the year and 34% over FY95. Increased localization costs related to Windows 95 and continued investment in Business Systems and Developer divisions drove the year over year growth.
- Other product development costs for the full year include \$7 million related to DreamWorks Interactive and \$20 million related to development agreements with DEC.

- FY96 sales expenses totaled S917 million, 98% of plan mainly due to lower than plan headcount.
 Sales expenses grew 21% over FY95 mainly due to increased.
- Channel marketing, including Broad Reach, totaled \$785 million in FY96, 4% over plan but 2% under approved incremental spending. Additional marketing funds were approved primarily for Internet related marketing. Marketing expenses grew 56% over FY95.
- Product support costs were even with plan for FY96 and 49% over FY95 reflecting increased costs due to the Windows 95.
- Q96-4 expenses were 28% over plan with above plan spending across all geographies reflecting the year end accruals of committed dollars and outstanding invoices.

- General and administrative costs include corporate cost centers that support MS on a worldwide basis.
 These expenses include IT project development and regional support, corporate finance, legal and corporate affairs, HR services such as employee development, compensation and recruiting, and certain worldwide real estate and administrative support services.
- For the year, general and administrative costs were 3% of net revenue and 5% over plan. Costs grew 15% year over year primarily due to increased ITG spending for application development and incremental operational support costs. Legal costs related to higher incidence of litigation, piracy
- efforts and dispute resolution have also contributed to the growth.
- ITG costs exceeded plan by \$18 million for FY96 primarily due to approved plan variances for \$AP and Channel Measurement, and over plan spending on several other significant projects. See General and Administrative section for more information..
- G&A expenses were 17% over plan in Q96-4, driven primarily by year end accruals of commitments and outstanding invoices. G&A headcount totaled 2.261 at year end, a 23% increase over FY95 and 6% below full year plan.

HEADCOUNT

- Microsoft headcount totaled 20,561 at year-end, growing 15% over FY95, and 90% of full year plan.
- All units were below approved plan for the year.
 Product groups grew 24% year over year, general and administrative was up 23% and sales and
- marketing heads increased 13%. See Appendix for more details on headcount.
- FY97 headcount is planned to grow 16% to 23,904, with largest increase in product group heads (30%), offset by slower growth in sales and marketing (13%) and general and administrative (14%).

 Worldwide inventory turns improved to 2.0 during the quarter primarily due to reductions made in North America gross inventory. Primary reasons for the improvement were full implementation of Genesis forecasting process which resulted in a \$10 million reduction in raw material inventory, and the disposal of \$21 million of obsolete 16-bit and excess Desktop 95 inventory. Overall turns continue to suffer from excess Desktop 95 inventory yet to be disposed of.

SUMMARY OF OPERATING STATISTICS

AUTHOR: BOBLUNN (BOBLU)

MICROSOFT CONFIDENTIAL - W2

MS-PCA 1192525 CONFIDENTIAL

COST OF REVENUE SUMMARY

 Finished goods cost of revenue year to date was 15.1% of net revenue versus plan of 16.8%. This positive variance was largely due to a substantial decline in standard product costs described below, offset by \$94 million in charges for excess Desktop 95 products.

Standard Product Costs

- Standard product costs consist of all costs incurred to manufacture and assemble finished goods.
 These costs include labor, overhead, and material costs at a standard rate.
- Total finished goods standard product costs were
 6. % of net revenue, 2.8% or \$126 million less

Other Manufacturing Costs & Variances

 Other Manufacturing Costs & Variances includes manufacturing variances, hardware, and program costs.

Inventory Adjustments

 Inventory adjustments include charges for inhouse scrap, re-cost impacts, provisions for inventory obsolescence, and cycle count adjustments.

Pipe Processing

 Pipe processing represents expenses related to order processing, billing and collection activities incurred at Regional Operation Service Centers (ROSC). Third party vendors costs for fulfillment activities related to MSDN and MES are captured within pipe processing, while all other fulfillment costs are captured in local processing as noted below.

Royalties

- Royalties include payments to third parties for the right to use intellectual property in MS products.
- Royalty expenses totaled 1.3% of net revenue versus plan of 1.6%. This favorable variance was due primarily to an amendment to the agreement affecting royalties for Grammar and Spell Checker used in Word and Works and the buyout of the

than plan. This reduction was due to an increased mix of CD ROM media version products and a shift to Select and other licensed product sales. On a worldwide basis, CD ROM based product comprised 58% of total packaged product as compared to plan of 37%, and the mix of licensed product totaled 45% versus plan of 36%.

- Total FY96 manufacturing costs were \$132 million, or 28% higher than plan. This unfavorable variance was primarily due to program costs for MSDN and MES courseware in North America and Europe.
- Inventory adjustments totaled S89 million for the year, S58 million higher than plan due to increased inventory reserves for excess and obsolete 16-bit Office, Desktop 95, and keyboards.
 These costs in excess of plan by region were North America -S36 million, Europe -S11 million, and ICON -S11 million.
- FY96 pipe processing costs totaled \$57 million, 29% higher than plan primarily due to fulfillment fees related to sales programs in North America and Europe.

royalty agreements for Flight Simulator and Encarta. The per unit royalty for Grammar and Spell Checker was replaced with a flat license fee paid quarterly. The buyout of Flight Simulator and Encarta agreements replaced higher royalty expense with the amortized cost of the buyout agreements.

Returns Scrap/Rework

 Returns scrap/rework includes direct material, labor and overhead costs associated with product that has been returned and scrapped or reworked.

Local Processing

- Local processing includes all costs related to fulfillment activities at both international sales locations and ROSCs. In addition, this line item includes all pre-sale communication, order processing, billing, and collection activities incurred by international sales locations.
- For the year, returns scrap/rework totaled S75 million, or S33 million over plan primarily due to allowances for actual and anticipated returns of Desktop 95 products.
- 8 FY96 local processing costs were S43 million or S5 million below plan due to lower than anticipated direct fulfillment and headcount costs in all regions except Europe.

- During FY96, Worldwide Operations began reporting financial results by business stream, a view that is more consistent with MS's changing business model as illustrated by the dramatic shift from manufacturing packaged product to license and subscription programs. Beginning with FY97, monthly and quarterly reporting will be done by business stream.
- The business streams represented above include the following business models:
 - Software Packaged Product primarily full packaged product sales to the channel, including MLP. Primary cost drivers for this business stream include manufacturing, order processing, inventory, distribution, and freight related costs.
 - Hardware Packaged Product includes both OEM hardware and retail sales primarily consisting of mice and keyboards. Primary cost drivers for this business stream include outsourced manufacturing, tooling, inventory, distribution, and freight related costs.

- OEM Licensing primary costs include processing of royalties reports and distribution of CD master discs.
- Retail Licensing includes Select and MOLP sales, and includes the costs of master disks and documentation distributed to licensees, and related processing costs.
- Subscriptions and Annuities includes courseware, MSDN, VC++, developer subscriptions and solution provider program, material and related processing costs.
- Direct Fulfillment includes cost of packaged product and supplemental parts sold through fulfillment, as well as fees paid to third party fulfillment vendors.

Business Results

- Net revenue for the Applications & Content Group (ACG) totaled \$1.26 billion in Q96-4, 27% better than plan and 35% over last year. Net revenue for the year was \$4.66 billion, exceeding plan by 12% and FY95 by 30%. Continued growth of Office products accounted for the positive plan variances, offsetting below-plan results in MOS.
- Desktop Applications Division (DAD) Q96-4 net revenue of \$1.05 billion exceeded plan by \$283 million or 37%, including \$184 million from the reversal of the Desktop 95 channel reserve. Total FY96 DAD revenue reached \$3.78 billion; 16% above plan, and 28% above FY95. On a regional basis, DAD revenue grew 29% over FY95 in North America, 27% in Europe, 32% in ICON, and 56% in the Far East. As shown in the graph to the right, revenue increases came primarily from growth in Select and MOLP retail licensing programs, and OEM.

DAD REVENUE MIX

Q96-4 Consumer division net revenue of \$189 million was about as planned. FY96 net revenue of \$816 million was 1% below plan, and exceeded FY95 by 30%. Higher than plan revenue from Input Devices and Works was offset by below plan revenue from Kids. Entertainment, Information, and Productivity products. Product returns during FY96 totaled \$79 million, 13% of shipments.

- Net revenue from MSN totaled S21 million in Q96-4, 9% over Q96-2, but 46% below plan. The negative variance to plan was primarily due to lower subscription and access revenues caused by continuing billing system problems and a change in content strategy which has impacted extended services revenue. Net revenue totaled S50 million for the year, 36% below plan.
- ACG gross margin was 83% of net revenue for Q96-4 and 81% for FY96, compared to 83% in Q95-4 and FY95, reflecting improvements in DAD, offset by higher than planned MOS data center and telecom costs.
- DAD FY96 gross margin was nearly 90% in FY96, 3 percentage points above plan and FY95.
 The primary drivers include increases in CD media. licensed products. lower bill-of-material costs and increasing OEM sales. OEM licenses grew from 9% of revenue in FY95 to 16% of revenue in FY96
- Operating expenses for ACG totaled \$420 million in Q96-4, 27% over plan, primarily due to timing of marketing spend and higher MOS content costs.
 FY96 operating expenses were about as planned.
 Year-over-year costs were up 44% for the quarter

and 50% for the full year, the result of major investments in Consumer and MOS.

- DAD FY96 total operating expenses were 2% below plan due primarily to lower than planned product support and shared resources costs. For the year, DAD achieved a 60% contribution margin; 9 points above plan, and 7 points above FY95. DAD contributed \$2.3 billion to Microsoft's operating income in FY96.
- Consumer division operating expenses for the quarter exceeded plan by 26%, due in part to amortization of fourth quarter acquisitions and plan variances in the timing of localization spend.
 Operating expenses for FY96 exceeded plan by 2%. Consumer headcount ended the year at 1.026 versus a revised budget of 1,293.
- ACG total contribution margin was 35% for Q96-4 and 38% for FY96, compared to plan margins of 31% for the quarter and 32% for full year. These favorable results were due to higher revenues, improved gross margins and below plan operating expenses in DAD.
- ACG head count totaled 3,388 at year end, 14% under plan.

Outlook

- Development efforts for Office 97 are focused on shipping a limited number of skus (CD versions of Office 97 and OfficePro 97) in the US by early November in time for the holiday season. Other variants of Office 97 and standalone versions of Word and Excel are expected to ship in Q96-3.
- Apple Computer agreed to bundle Mac Office on all PowerMacs sold in Europe. It is estimated that this agreement will generate \$40 to \$60 million in revenue in FY97.
- Revenue from Consumer software products is expected to increase 34% in FY97 with the most of the growth anticipated in the Action/Strategy, Kids and Reference product units. The division expects to ship 23 new titles in Q97-1, including

Desidop Applications Review

Investments & Product Highlights

- Representatives from DAD development and marketing organizations are demonstrating new Office 97 features and discussing product strategy, pricing and positioning to research organizations and industry analysts. Initial feedback has been favorable. These briefings have been modeled after the very successful Windows 95 briefings last year.
- Office 97 is the most significant Office release todate in terms of development effort and integration. Office 97 will include Outlook, a 'desktop information manager', which includes an e-mail client, scheduler, contact manager, task manager, and other workgroup features. Other significant features include Internet integration and Intellimouse functionality.
- In addition to Office 97. several other new Office product bundles designed to appeal to small business and home users will be introduced. The Office Small Business Edition bundle (Word, Excel. Outlook. Internet Explorer, Automap Streets and Publisher) will be priced comparable to the Office Standard edition and will be available only through the retail channel. A bundle designed

Competition

Corel

 On July 1, Corel shipped a 32-bit version of its WordPerfect suite. Early sales reports of the \$99 bundle are very positive, although Corel's Q2 (period ending May 30) results included only \$71

HIGHLY CONFIDENTIAL

Encarta Deluxe, Deadly Tide, and another title in the Magic School Bus series. Revenue from hardware products is expected to grow 9% on sales of the new Intellimouse and Sidewinder Game Pad.

MSN's subscriber base now totals 1.3 million.
This represents an increase of 290,000 subscribers
during Q96-4, slightly less than the 323,000
increase in the previous quarter, as the number of
new signups has decreased from the post-holiday
season rush during Q96-3. FY97 plan projects 1.8
million subscribers at the end of Q97-1 and
revenues for the quarter of S39m. Total plan
revenues for FY97 are \$280 million, with an
ending subscriber base of 4.5 million.

for home users will follow and will likely include Word, Encarta, Greetings Workshop, Bookshelf and Internet Explorer. Price, name and release date for this product are yet to be determined.

- After a very successful beta program, FrontPage version 1.1 is available in the retail channel at a special introductory price of \$109 for Office 95 users and \$149 for others. FrontPage allows nonprogrammers to easily create professional quality Internet or Intranet web sites. FrontPage was added to the Microsoft family of products with the acquisition of Vermeer Inc. in Q96-3
- Several groups from the former Consumer Division moved DAD to form the Productivity Business Unit. Dawn Trudeau leads this group which is responsible for Works and Publisher, as well as new products being introduced in FY97, such as Picture It and Greetings Workshop. These products will be used to create new product bundles which will appeal to markets in which Office has opportunities for growth including home and small businesses.

million in desktop productivity software revenue (now 81% of Corel revenue). Corel has publicly stated that they will keep only 600 to 700 of the 1,200 WordPerfect employees gained through this acquisition.

Lotus (IBM)

 Lotus is expected to ship a 32-bit version of SmartSuite in the 4th quarter of 1996. SmartSuite continues to be included on several OEM machines including IBM and AST. Lotus claims an increase in market share of suites from roughly 5% to 20%. MS believes this claim is somewhat misleading given that Lotus' revenue share has dropped and the bulk of their license sales are from OEM units, which often are not used by endusers who buy PCs with pre-loaded software.

Consumer Review

Investments & Product Highlights

- MS acquired EXOS Inc. and Electric Gravity Inc. during Q96-4 to strengthen offerings in the games product line. EXOS develops force feedback technology for game control devices that enables users to feel gaming effects such as car crashes and flight simulations, while Electric Gravity creates software which allows users to play games such as bridge, checkers and chess over the Internet.
- Revenue from MS Works was \$142 million in FY96. 24% above plan and 9% over the prior year. This growth was driven primarily by sales through the OEM channel.
- MS Encarta gained sixteen share points during FY96, becoming the clear leader in the encyclopedia category.
- Bookshelf 97, Magic School Bus Explores Inside the Earth, and Close Combat shipped in Q96-4.
- Consumer products won several awards at the Electronic Entertainment Expo (E3) in May. NBA Full Court Press won "Best of the Best" from PC Gamer as one of the top ten products at E3. PC Gamer also awarded "Best of Show" for NBA Full Court Press, Close Combat. Age of Empires and the Condemned. GEX, a game with a story line based upon classic TV shows and "B" movies, received an Editors Choice Gold Award from Electronic Gaming Monthly and received the Video Game Character of the Year award from Die Hard Game Fan magazine. In addition to the awards, the gaming press gave great endorsements to our upcoming lineup which is vitally important to MS being seen as a serious game vendor.
- Cityscape development continues with Seattle, San Francisco and New York expected to go online in early 1997. Operations have also begun in San Diego, Chicago, Minneapolis, Boston and Sydney.

Competition

 City Search Inc., an Internet start up company with features similar to MS Cityscape, acquired Metrobeal a source of information about the arts, entertainment and events in New York. City During Q97-1, the Cityscape team will also increase recruiting efforts in Los Angeles. Washington DC and London and kick off recruiting in eight other markets.

- MS Expedia (MS Travel) is expected to launch in October with a beta version scheduled for July.
 Expedia will allow PC users to purchase airline tickets, make car and hotel reservations, and view hotel locations on a detailed map. MS Automap Streets Plus. Automap Online and Automap Trip Planner will also be integrated into MS Expedia's online booking capabilities.
- During Q96-4 MS and DreamWorks Interactive (DWI) entered into an agreement where MS will manufacture, distribute and sell software products developed by DWI in exchange for a distribution fee. DWI will provide end user marketing. The first four titles scheduled to be distributed under this agreement include Goosebumps: Escape from Horrorland, The Neverhood: A Curious Wad of Klay Finds His Soul, Let's Get Cookin and Cooper McCue Breaks Through!.
- The Encarta Schoolhouse is a new educational Internet site where students and teachers can access the content of MS Encarta. Services like Encarta Schoolhouse and the online Teacher Activity Guides on Encarta and other education relevant titles allow teachers and students to find information for homework, research projects and lesson plans, while encouraging interactive learning.
- John Neilson joined the Consumer Division during the quarter, managing the Information Products Group which includes the Reference, Geography, Travel, Cityscape and Personal Interests businesses. Lisa Brummel has moved from Group Manager for division product marketing to lead the Kids product unit.

Search has announced plans to have sites in thirty cities by the end of 1997.

MS-PCA 1192532 CONFIDENTIAL • The American Automobile Association (AAA) and DeLorme have joined together to create AAA Map'n'Go, a new travel and mapping tool which was released the end of June. The CD-ROM provides AAA's database of accommodations, restaurants, attractions, directory of AAA offices, GPS link, street-level maps for 241 cities and a link to the DeLorme's Web site for updated weather, construction and events information. Other competitors in this market includes SABRE Interactive and Worldview Systems Corporation, the creators of Travelocity, who have announced

an agreement with Infoseek Corp. to develop travel content on the Internet.

 Disney Interactive acquired Sanctuary Woods' entertainment software studio and its proprietary game development engine. The studio is expected to produce four to six interactive family oriented titles each year. Separately, Disney Interactive announced its planned release of three Japanese language CD-ROM titles based upon popular U.S. software. Also, NEC entered into an agreement with Disney to use it's characters in educational software to promote NEC PC's in Japan.

Desktop Finance Review

Investments & Product Highlights

- The Desktop Finance Division was created in March to focus on online banking strategies and products. The initial development focus includes the Open Financial Connectivity specification and development of ActiveX controls for home banking on the Internet.
- MS's online-banking strategy is based on providing banks choice and flexibility in building online banking offerings. The foundation for this strategy is the recently published Open Financial

Competition

- Intuit Inc. recently announced BankNOW, online banking software designed for PC users who want an easy, no hassle way to conduct online banking and bill payment. BankNOW will be available later in the summer and initially link more than six million America Online subscribers with participating financial. Intuit plans to make BankNOW technology available to Internet users later in the year.
- Intuit Inc. also announced the acquisition of Interactive Insurance Services Corp. (IIS). IIS is the developer of an Internet based system that gives consumers personalized insurance information from major insurance carriers via the World Wide Web.

Connectivity (OFC) specification, a technical specification that supports the delivery of home banking services using multiple home banking software products and back-end solutions. Fiftyeight financial institutions have committed to offering online banking services under OFC using MS Money.

- Money 97, planned for release in July, will allow consumers to use bill payment services from VISA and BillPay. Other new features include access to Internet resources such as stock quotes and the MoneyZone, a web site with up-to-date news, information and customer support for users of Money.
- IBM and 10 large banks announced plans to form a new home banking services company, tentatively called INET. Initially, this company will provide services that allow home PCs to link with banks via IBM's global communications network and the Internet and provide features such as fund transfers, bill paying and obtaining mortgage rates. Each participating bank will be able to brand these services under its own name.

MS Online Review

Investments & Product Highlights

 The Microsoft Network (MSN) active subscriber count reached 1,295,000 at the end of Q96-4 up from 1,006,000 last quarter as shown in the following chart.

 New customer sign-ups averaged 182,000 per month during the quarter. Of these, approximately 75% were converted from a trial to paying member basis.

 MSN is currently receiving 550,000 connections to the service per day, representing

155,000 hours of connect time. Maximum simultaneous connections to the service neared

Competition

 As of June 30, 1996 subscriber counts for the major online services were as follows:

 America Online, CompuServe and Prodigy have recently experienced flat or declining growth in subscribers. Only through accounting changes (adding new customers from sources not previously included) have they shown subscriber or with.

> HIGHLY CONFIDENTIAL

- 12,000 in June, up from 10,700 at the end of Q96-3.
- During the quarter MSN experienced significant problems with its billing system causing delays in customer billings and the recognition of revenue. As of June 30, there was a two month backlog of connection events waiting to be priced and billed. A new version of MSN (1.3) scheduled to be implemented in late July is expected to significantly improve the billing system.
- Version 2.0 of MSN is planned for release in September and will introduce a variety of new online programming and technologies.
- In the quarter, Microsoft and CompuServe announced a far-reaching strategic alliance. Under the agreement, CompuServe will deploy MS's new platform for commercial Internet services, named "Normandy" in its suite of online services, including the CompuServe Information Service, WOW! and SPRYNET, CompuServe's Internet-only service. Normandy is an Internet platform solution designed specifically for Internet service providers and commercial Web publishers built on Windows NT Server operating system and integrated with MS Internet Information Server. The technologies licensed by CompuServe include the major components needed to run a commercial, fee-based service, including value-added mail, forum areas, chat, news indexing and other content management services.
- America Online's President and Chief Operating Officer, William Razzouk, quit after only four months on the job. Steve Case said he would assume the roles until a replacement could be found.
- International Wireless, a closely held telecommunications investment group, acquired Prodigy from IBM and Sears.
- Intel bought a 4.5% stake in CINet which represents Intel's first major entry into the world of Internet content. The CINet IPO was priced at \$16. higher than the anticipated price of \$13 to \$15.
- America Online settled the 11 class action suits
 brought against it regarding its billing practices, most
 significantly, the practice of adding 15 seconds to
 each login to account for the network time it takes to
 make the connection, the giitch where members are
 billed for time in the "free" areas, and rounding up to
 the next minute.

Business Results

- Business Systems Division (BSD) revenue exceeded \$1 billion for the first time with FY96 net revenue totaling \$1.08 billion, 59% over plan.
 Q96-4 net revenue totaled \$334 million, 67% over plan on continued strong sales of Windows NT and BackOffice.
- Shipments of new Windows NT Server (NTS) licenses totaled just under 400,000 in FY96, a 177% increase over FY95, while shipments of new Windows NT Workstation licenses approached 1.1 million, a 321% increase. NTS shipment share is estimated to have grown to 25% of the Server OS market during FY96, up from 13% in FY95.
- MS Exchange, released in March, generated revenue of \$24 million during FY96 with revenue from all MS messaging products exceeding \$110 million, a 45% increase over FY95.
- Personal Systems Division (PSD) net revenue totaled \$794 million for the quarter, exceeding plan by 36% on continued strong OEM sales of Windows 95. For the year, PSD revenue totaled \$3 billion, 13% over plan and 87% greater than FY95.

- At year end Windows 95 was being used by an estimated 35 million users and was preinstalled on 68% of all PC shipments reported during Q96-4.
 MS Plus! generated \$89 million in FY96, 90% better than plan.
- Developer Division revenue totaled S90 million, 22% ahead of plan for the quarter. On a year-todate basis, net revenue was S400 million, 14% better than plan on strong sales of Visual Basic (VB) and MSDN. Sales of VB for the year were \$151 million, growing 102% over FY95 on shipments of over 788,000 licenses. C++ hit \$100 million in revenue during FY96, a 26% improvement over FY95.
- Platforms Group gross margin for the year was 93% of net revenue versus a plan of 90%. This improvement was driven by strong OEM revenues coupled with improved BSD gross margins due to savings in product packaging, and the increasing mix of CD ROM and Select sales.

 Platforms Group operating expenses totaled \$1.47 billion in FY96, 4% over plan primarily due to \$57 million of unplanned intellectual property acquisitions and technology settlements charged during FY96, along with incremental marketing spending for Internet Explorer approved at midyear. The responsibility margin of 60% was 7 percentage points better than FY96 plan primarily due to higher than plan BSD and PSD revenue.

Outlook

- PSD development is focused on delivering Windows 95 OSR (OEM service release) and Internet Explorer 3.0 in August, and Internet Explorer 4.0 and Nashville in Q97-2. Nashville will be preinstalled on Windows 95 and NT Workstation PCs sold by OEMs, with an upgrade available through the retail channel.
- Release of Windows NT Server and Workstation 4.0 is on schedule for Q97-1. This release eagerly anticipated by OEMs and is expected to fuel strong
- growth for both products. NTW is expected to garner 4% of the OEM preinstall business in FY97.
- Developer has a busy year planned with releases of several new products including VB Script, Visual J++, Internet Studio, and Developer Office, and updated versions of Visual Basic, Visual C++, and MSDN products.

Business Systems Review Investments & Product Highlights

BSD Quarterly Revenue

- MS SQL Server 6.5, which shipped in April has several key new features including support for Internet applications, heterogeneous replication, better distributed transactions management, enhanced distributed management tools and Dynamic Locking, a new locking architecture.
- MS SQL Server achieved a new TPC-C price/performance benchmark record of \$121.32 per tpmC (transaction per minute) with overall performance of 5517 tpmC. MS SQL Server currently holds four of the five top performance benchmark records.
- Windows NT Server and Workstation 4.0 release candidates were completed in mid-June with final releases expected to be available in Q97-1.
- BackOffice Server 2.0 was updated in early May to include Exchange Server 4.0, Internet Information Server 1.0, and MS SQL Server 6.5. Pricing remains unchanged.
- A beta version of Microsoft Proxy Server, a secure gateway between LANs and the Internet, was released in June and downloaded by over 10,000 users the first week. Proxy Server is a high performance server integrated with Windows NT that filters and replicates Web content, and caches frequently accessed Web documents. RTM is planned for Q97-1.

- A beta version of Systems Management Server 1.2
 was shipped to selected customers worldwide in
 May. New features include improved remote
 control capabilities, performance enhancements to
 inventory and job scheduling, and SNMP event
 forwarding and receiving.
- SNA Server 3.0 beta was launched in June, with final RTM expected in Q97-2. This update incorporates password synchronization, host print services, increased user capacity, data encryption, and improved administration.
- MS demonstrated Windows NT Server Wolfpack clustering technology at the PC Expo in June. Five lead server OEM's are expected to deliver the product in Q97-3.
- MS, in conjunction with Digital, Intergraph, Intel, and several other companies, announced support for the Common Internet File System (CIFS).
 CIFS is an enhanced version of the Server Message Block (SMB) protocol, the file-sharing technology used in MS-DOS, Windows, Windows NT, OS/2, and leading UNIX systems.
- Apple Computer began efforts to port Windows NT to its line of PowerPC based servers.
- MS held an another successful Intranet strategy day on June 13th and announced that FrontPage and a Search Server would be added to Windows NT Server 4.0. MS also announced NT Directory Server will combine elements of DNS (domain name server) and X.500 as an upgrade to Windows NT Server 4.0.
- MS announced its intention to support 64-bit data in Windows NT Cairo. This functionality is targeted to meet the needs of customers who require access to very large databases.
- MS and Tandem announced a strategic alliance in which Tandem will port its ServerNet clustering and Nonstop ServerWare™ technologies to the Windows NT Server platform. In addition, the agreement calls for cross-licensing of technology patents.

Source: Neural: Web Survey of 299,403 Internet connected computers, July 1996

- In April, Netscape announced three new server products:
 - Proxy Server 2.0 will provide LAN to Internet links and caching of frequently accessed documents inside corporate firewalls.
 - Mail Server 2.0 is a client-server messaging product based on SMTP and the Internet Mail Access Protocol (IMAP4).
 - Certificate Server enables organizations to issue, sign, and manage public-key certificates using Secure Sockets Layer (SSL) for secure communication over the Internet or Intranet.

These products will be offered individually at \$995 or as part of SuiteSpot, and will be available in the second half of 1996 on Windows, Windows NT, Alpha, and UNIX platforms.

 Oracle announced a 60-day free trial offer for WebServer 2.0 beginning in late April. WebServer is a platform for Web publishing and applications offering secure connections to corporate databases, allowing users to access and publish dynamic data over Intranets and public Web sites. Following the free trial, WebServer will be available at \$2,495 for SPARC and Windows NT platforms.

Personal Operating Systems Review

Investments & Product Highlights

- Windows 95 life-to-date sell-through is estimated to be about 35 million licenses. Windows 3.x lifeto-date shipments now exceed 131 million.
- MS and CompuServe entered into a strategic agreement in May where CompuServe agreed to market, promote and distribute Internet Explorer (IE) as its primary web browser. In exchange, Microsoft will provide access to the CompuServe online services by adding an icon for the services to a folder on the Windows 95 desktop.
- In April, MS announced plans to integrate support for Sun Microsystems' Java technology into future versions of Windows 95 and Windows NT

HIGHLY CONFIDENTIAL

- In June, Oracle announced InterOffice, a platform for developing and deploying collaborative applications based on Oracle's Universal Server.
 Scheduled for delivery in the second half of 1996, InterOffice will provide support for electronic messaging, document management, workflow, video, and OLAP.
- During June, Novell began shipping betas of Green River, its next release of Netware. Key enhancements include SMP support, TCP/IP for Internet access, C-2 security, and simplified administration and installation tools. The product is expected to be available later in the fall.
- Novell also announced beta availability of GroupWise 5 (previously GroupWise XTD), with a final product launch expected later this summer. Groupwise is a client-server messaging system which integrates calendaring, scheduling, task management, shared folders, conferencing, workflow and Web access.
- In May, Lous announced the availability of Lotus Notes 4.1 for DEC AlphaServer running Windows NT, the outcome of a development and marketing alliance announced last year by Lotus and Digital.
 Notes 4.1 includes the InterNotes Web Publisher which enables the creation, management and administration of Web sites using Notes. Notes 4.x for Digital UNIX is expected during the second half of 1996.
- In June, Lotus began beta testing its Domino Internet Server, which will enable Notes developers to build interactive applications that can be accessed over the World Wide Web or via a Notes interface. Due for release as part of Notes 4.5 in Q97-2, Domino is being developed for the Windows NT, Solaris, AIX and HP-UX platforms.
- As of April, IE 2.0 was shipping on Windows 95, Windows NT, Macintosh, and Windows 3.1. The Windows 95 version is now available in 25 languages.
- The IE 3.0 beta was released on the MS Web site in May, with enhancements to support Java added in June. Internet Explorer has been downloaded 1.6 million times to date, 700,000 of which have been the IE 3.0 beta.
- Since its March release, the Internet Starter Kit has sold-through an estimated 22,000 retail units in North America.

- · Netscape Communications Corp. released its Navigator 3.0 beta in April which included JavaScript, real-time Internet Telephony, a shared whiteboard application, and VRML support. Navigator 3.0 also includes an Apple QuickTime plug-in and extensions for QuickTime VR. Netscape also announced in April its decision to license Borland's AppAccelerator, a just-in-time compiler which improves Java application performance, and intends to incorporate it into future Navigator releases.
- Netscape and Bell Atlantic announced Bell Atlantic will provide co-branded Netscape software to its business and residential customers.
- Netscape second quarter earnings beat analysts' expectations with strong revenue growth to \$75 million, up 36% from its first quarter. Browsers comprised 60% of revenue, servers 24%, and the remainder from services. Net earnings for the quarter totaled \$906,000, including a \$4.9 million charge related to the acquisitions of InSoft Inc., Paper Software Inc. and Netcode Corp.
- Netscape recently announced its Navigator browser has 38 million users, a claim which drew skepticism from industry press. Dataquest estimates the total number of Internet users at the end of last year was 26.4 million worldwide. Netscape is estimated to have sold 17.4 million copies of Navigator through its retail, OEM, and corporate channels.
- In June. Oracle launched PowerBrowser 1.5. a free Web development environment and navigation designed specifically for Intranets. PowerBrowser incorporates database programming wizards, a personal Web server, support for Network Loadable Objects, and builtin BASIC and Java scripting.
- IBM announced an agreement with Apple which allows IBM to sub-license Mac OS to any manufacturer building systems with IBM PowerPC

- microprocessors. Datatech Enterprises and Tatung were among the first to announce intent to sublicense under this agreement.
- In June, IBM began OS/2 Warp beta testing of the upcoming Merlin release, which will include speech recognition, Java support, and remote help capabilities which allow examination of a customer's system by modem. The update will also include Lotus Notes Mail, a client of Notes release 4. Merlin is expected to be available in the second half of 1996.
- In early July, Apple shipped System 7.5.3, the latest Mac OS upgrade with a S99 US ERP, and a \$49 version upgrade ERP. Product features include the Apple Internet Connection Kit with Netscape Navigator, Claris Emailer Lite, access to America Online along with one-button installation, OpenDoc support, QuickTime and QuickDraw updates, and the addition of PlainTalk, a text-tospeech converter.
- In June, Apple completed a \$661 million placement of five year convertible subordinated debentures. The notes will be redeemable at the company's option after three years, will have a 6% coupon and will be convertible to common stock at \$29,205 per share. This transaction was intended to provide working capital to execute plans to return Apple to profitability.
- Apple shipped Newton Internet Enabler 1.0 (NIE), a suite of connectivity tools allowing Newton developers to create Internet-based solutions such as mail, news, Telnet and FTP applications, and enhanced mobile Internet access. NIE is available on Apple's Web site at no cost.
- Apple, IBM, Netscape, Oracle, and Sun announced support for NC Reference Profile 1, a common set of guidelines for developing low-cost, easy-to-use network computing devices.
- Sega announced Saturn Net-Link, an Internet addon device for the Sega Saturn which enables Internet access, networked gaming, email and chat from a system costing less than \$500. The \$199 package includes a 28.8 bps modem and a customized Internet browser. Net Link is scheduled for release this Fall.
- Phillips Electronics and Sony announced plans to market a set-top box offering TV-based Internet access, connecting directly to a TV set and a telephone line, and controlled by a hand-held remote. The implementation relies on software licensed from WebTV Networks and will be available this Fall for between \$200 and \$400.

Developer Review

Investments & Product Highlights

- MS announced the Microsoft Developer Network (MSDN) Universal Subscription, an annual simplifying custom solutions subscription delivering information. development by technology and development tools in one comprehensive product. Developers will receive everything they currently get in the Enterprise Subscription as well as Office Professional, Project and selected Visual Development Tools, ensuring Universal subscribers are up-to-date with the latest MS tools and technologies.
- MS announced Visual Basic Applications Edition (VBA) licensing in June. By licensing VBA, MS will allow independent software vendors to embed this programming tool in their applications, turning them into customizable development platforms immediately accessible to the millions of Visual Basic programmers.
- MS announced a pact with Metrowerks Inc. which will integrate Microsoft ActiveX technologies with

Competition

- Adobe Systems announced their intention to incorporate Microsoft's ActiveX technology into future tools used for creating and distributing graphically-rich documents over the Internet. Adobe intends to support ActiveX in a forthcoming version of the HTML authoring tool, Adobe PageMill.
- Apple announced it licensed Sun's Java programming environment and will make Java an integral part of its operating systems, including Mac OS, Pippin and Newton.
- Borland International announced it expects a firstquarter loss of 53 to 56 cents and the resignation of its president and chief executive officer, Gary Wetsel. The company said meager demand for Delphi has resulted in a build up of large inventories among distributors and retailers.

- Java for its CodeWarrior application development products for the Apple Macintosh. The agreement enables developers to create rich, powerful Internet applications while taking advantage of existing development tool investments.
- MS announced the ActiveX Template Library (ATL) is available free of charge on the Web to C++ developers. This new library provides developers with a convenient mechanism for building lightweight and fast component object model (COM) objects.
- The MS Access Upsizing Tools for Windows 95 are now available at no charge to Access developers. These tools allow developers to migrate Access based applications into MS SQL Server.
- As of May, MSDN has been in the reseller channels. MSDN is an essential companion for developers implementing Microsoft technologies.
- IBM demonstrated a prototype of Arabica, the world's first Java Beans implementation. Arabica, which is based on OpenDoc technology, will provide an open, cross-platform component architecture for developing Java applets and applications. The Java Beans initiative will allow developers to write portable Java applets and applications using reusable software components.
- Netscape announced it is bundling Borland's AppAccelerator just-in-time dynamic compiler with Navigator in an attempt to improve Java application speed and performance.

Consumer Systems

Authoring Tools

- MS announced Softimage's (SI) Digital Studio will be commercially available this year. This NTbased technology will provide a single consistent application for professional nonlinear editing and compositing, 2-D and 3-D painting, audio editing, titling, special effects, and project management. SI will position Digital Studio as the cornerstone of an evolving SI solution.
- Softimage 3D 3.5 for Irix released with enhanced modeling, animation, and rendering capabilities,

Public Network Services

- Microsoft acquired eShop, a California-based company whose technology provides an online retail store environment. eShop will be integrated into the MS Merchant Server effort.
- Several security and electronic commerce products
 were introduced during the quarter. Sun
 introduced SKIP (Simple Key management for
 IP). Netscape introduced LivePayment, server
 software for collecting payments, along with
 releasing Merchant System 1.5 with enhanced
 merchandising features. IBM introduced
 Net.Commerce, a virtual storefront, with their
 initial customers being the Atlanta Olympics and
 L.L. Bean. AOL deployed atOnce software from

Advanced Development

 MS purchased aha!, a leading developer of electronic-ink note taking and editing software for mobile computers and communicators.

- as well with an effects library and special features for game developers. The NT version will be released in August.
- SI net revenue for the year was \$33 million 19% below plan primarily due to delayed shipment of NT version of 3D, lower average revenue per license due to distribution transistion and competitive pressures, and lower than planned Eddie & Toonz sales
 - OLI which enables members to purchase and download software directly to their PCs.
- The Federal Communications Commission is working on an advanced digital television standard which discourages the convergence of TV and computer technologies. The computer industry, including MS, along with cable companies and Hollywood have proposed and are actively lobbying for changes to promote the convergence.
- Comeast and Cox Communications each purchased a 14.5% stake in @Home, joining partners TCI and Kleiner Perkins, which own 45% and 14.5%, respectively.
- Patent search technologies developed by MS, which were originally intended for internal MS use, will be commercially licensed during FY97.

- Over 900 projects were localized in FY96 at a total cost of \$234 million. A project is defined as a unique combination of product, version and language. This definition excludes minor localization efforts such as porting products to additional platforms or localization of retail boxes and printed documentation. The year in which localization costs are incurred often does not correspond with the year in which the project is released. Hence, a significant amount of localization costs incurred in FY96 is related to projects that will be released in FY97.
- External costs include third party product development and contingent staff, while internal costs include people and infrastructure.
- Desktop Applications released 112 language versions of Office, Word. Excel. PowerPoint, and

- Project in FY96. Office and its components were localized into 25+ languages.
- Developer released 40 language versions of products such as Access, Visual Basic and Visual FoxPro.
- Consumer released 90 language versions of Works and various multimedia products. Significant investments were also made for five language versions of Encarta.
- Personal Systems released 27 language versions of Windows 95.
- Business Systems released 30 language versions of products such as NT Server and NT Workstation 3.51 and 12 language versions of Exchange.

Channel Highlights

- Q96-4 gross finished goods (FG) revenue was \$1.45 billion, 6% over plan and 24% over Q95-4.
 Strength in DAD and BSD offset weakness in Consumer and PSD.
- Net FG revenue for the quarter was \$1.72 billion, or 32% better than plan, including a \$363 million adjustment for channel sell through and returns of Desktop 95. All four geographic areas, North America, Europe, ICON, and Far East exceeded plan and combined for net revenue growth of 57% over Q95-4.
- FY96 gross finished goods revenue was \$6.82 billion, 10% ahead of plan and 51% over FY95.

Business Systems. Desktop. Applications. and Developer divisions each achieved plan, while Consumer and Personal Systems divisions fell short of plan. Leading the year over year increase was PSD with 251% growth with Windows 95 sales in the FG channel exceeding S764 million. In addition, BSD grew 155% to S914 million, while Developer grew 52%, Desktop Applications 32% and Consumer 17%.

 FY96 net revenue of \$5.40 billion was 10% ahead of plan. Far East was 39% over plan, Europe 7%, North America 6% and ICON 5%.

- Desktop Applications FG sales in the quarter totaled S938 million, S145 million above plan.
 FY96 revenue was 17% above plan and comprised 58% of worldwide gross FG revenue.
- Consumer division FG sales for Q96-4 totaled S98 million, S35 million under plan and slightly less than Q95-4. FY96 FG revenue from Consumer products was S536 million or 16% below plan mainly due to lower than plan software titles, the discontinuance of Bob and weak keyboard sales. Joysticks and mice ended above plan by 105% and 10%, respectively.
- Personal Systems FG revenue of \$119 million for Q96-4 were \$72 million below plan. Returns of Windows 95 and Plus! totaled \$42 million for the

- quarter and \$424 million for the year. PSD in the FG channel did not make FY96 plan, falling short by 2%.
- Business Systems division FG gross revenue for Q96-4 was \$305 million. 83% over plan with Windows NT and BackOffice continuing to show strength and growth across all geographies.
- Developer Division FG sales in the quarter were S94 million, exceeding plan by 22% driven by Visual Basic 4.0 and MSDN. Full year revenue from Developer products was S412 million, 13% over plan. Visual Basic and MSDN positive variances offset negative variances from Fox and Visual C++.

• Customers may return product in accordance with distribution contract terms. These terms vary by country, but allow returns for a percentage of the previous quarter's purchases, and stock rotation associated with new product releases. Q96-4 returns totaled \$153 million, primarily for Windows 95. MS Plus!, Office 95 and Office Pro 95 that were related to inventory accumulated during the launch and channel fill in Q96-1. FY96 returns totaled \$967 million versus \$404 million in FY95. Returns were notably lower in the Far East as they took advantage of the later release of DT95 products and "lessons learned" to avoid overfilling the channel. FY96 returns by region are as follows:

		Returns as a	% of Gros	s Revenue	
	N America	Europe	ICON .	Far East	WW Total
Desition Applications Consumer Personal Finance Personal Systems Business Systems Developer Total	12.7% 13.8% 38.4% 31.2% 2.8% 5.6%	6.2% 13.6% 21.6% 25.3% 5.6% 5.6%	72% 7.5% 3.7% 18.8% 7.8% 16.7%	27% 12% 0.1% 22% 5.3% 19% 37%	87% 125% 262% 27.0% 4.3% 5.5% 17.0%

 For internal management reporting purposes, revenue from Desktop 95 products (primarily Windows 95 and Office 95) was recognized as produce was sold through the distribution channel. The impact of this reserve on net revenue by quarter was as follows:

DT95 Reserv	e - (millions)
Q96-1	(\$1,009)
Q96-2	\$367
Q96-3	\$279
Q96-4	\$363

At June 30 this reserve has been fully reversed as DT95 channel inventory is not considered abnormal on a consolidated basis. Subsidiaries with channel inventory still in excess of normal charged a general returns reserve in June as follows:

Returns Reserve	(DT95)
N. America	\$20
Europe	11
ICON	2
Far East	0
Total	\$33

HIGHLY CONFIDENTIAL As the following table illustrates, sales to the top fifteen customers made up 56% of total Q96-4 revenues.

	C)96	4	096	3	O96-	?

All Others	638	45%	654	43%	717	51

- The timing and quantity of channel returns contributes significantly to the variances in quarterly sales to top customers shown above. For instance, sell-in to Egghead and Microage has been fairly consistent over the past three quarters with significant returns from these customers reflected in Q96-2.
- Gross margin from finished goods during Q96-4 was 88% versus plan of 83%. The positive variance was mainly due to the benefit of lower product costs associated with licensing program revenue. Select, MOLP, and Maintenance accounted for 59% of quarterly revenues versus a plan of 33%. In addition, the reversal of the DT95 reserve had a positive impact of over 1% on cost of revenue. For the year, FG gross margin was 85% vs plan of 83% and prior year of 83% for the same reasons.
- Controllable expenses for Q96-4 were 28% above plan due primarily to higher than plan marketing expenditure and year end accruals. People costs were 12% over plan in Q96-4 due to accruals for items such as bonuses and president's award and higher than plan travel expense.
- Full year people and infrastructure costs grew 21% and 11%, respectively, over the prior year, well below net revenue growth of 51%.

Marketing expenses of \$255 million during Q96-4, were over plan by \$109 million or 75%. For the year, marketing spend was over plan by 5% but

MSC 00568983

MEDISSET CONFIDENTAL - S3 MS6 6000686 CONFIDENTIAL

remained below total approved spending levels. FY96 marketing spend grew 48% over FY95 falling slightly as a percent of net revenue.

- As a percent of net FG revenue, FY96 net PSS expense was 6.6% versus plan of 7.4%. A combination of lower than planned incidents and higher than plan FG revenue drove down the PSS
- expense for FY96. See PSS section for more information.
- Responsibility margin for FY96 was 55.2%, up from FY95 actual of 49.4% and plan of 50.4%.
- The following table summarizes FG net revenue by country, sorted by net revenue.

		· · · · · · · · · · · · · · · · · · ·	FG Net Re	venue Rankin	g: June YTD: (000's)	
		96 Actual	96 Budget	95 Actual	% of Plan	%Growth	% of Total

NORTH AMERICA FINISHED GOODS REVIEW Region Highlights

- The Enterprise Customer Unit implemented a new customer segmentation model worldwide. This model provides a framework to focus on top sales opportunities within the Enterprise. Its primary objectives are to optimize allocation of limited field resources and marketing programs, and improving customer satisfaction so that revenue growth opportunity is maximized. Additionally, MS has formed a strategic alliance with Tandem Computers to promote Windows NT whereby the companies will cross license technology, and Tandem will port it's high-end Serverware middleware software to Windows NT.
- Sam Jadallah was promoted to Vice President of the Organization Cestomer Unit replacing John Nielson who was named to head the Information Products Group in the Interactive Media Division. Jadallah was most recently general manager of worldwide business strategy managing the microsoft.com and customer marketing database groups. Prior to that assignment Jadallah led the redesign of Microsoft's support organization in anticipation of the launch of Windows NT.
- US headcount utilization was critically evaluated during the FY97 budgeting process. The goal was to create a more logical view of how headcount resources are deployed and what changes might be made to better position resources to address selling opportunities and respond to competitive threats. As a result, approximately 150 positions will be redeployed in the US in FY97 to direct selling positions from indirect selling or marketing roles. Most of these positions will be moved from Redmond to the district field offices.
- The End User Customer Unit (EUCU) is responsible for sales and marketing activities to household, small business and channel partners that serve these customers. The EUCU is currently facing competitive threats in the home office suite and internet browser categories, primarily in the retail channel. An effective response will be implemented in the August through January time frame. Over the past quarter, the EUCU has implemented six key processes which produce close integration of the product groups with North American Operations and leverage off the Segment Team reorganization completed in Q96-3. These processes are aimed at increasing revenue and reducing costs through more efficient communication and support of channel partners in

- the areas of product launches, marketing and promotional initiatives, retail outlet coverage, and inventory management.
- As the importance of technology in Education increases, the North American sales organization has formed an Education Customer Unit to focus on this growing market. Liż King was named as general manager of this new customer unit which will focus on driving Windows penetration and academic edition revenue in the K-12 and Higher Education markets, developing a leveraged selling model for these markets, and projecting a leadership image for Microsoft in the education community.
- Finished goods gross revenue in North America totaled \$636 million during the quarter, exceeding plan by \$82 million or 15%. Desktop Applications Division (DAD) and Business Systems Division (BSD) products drove the variance. Gross revenue during Q96-4 grew 26% over Q95-4 and 5% over Q96-3.
- Desktop 95 packaged product inventory reached normal levels in the North American channel except for an estimated \$20 million of product which is expected to be returned in Q97-1. Recapping the Desktop 95 situation, during FY96 packaged product sell-in revenue totaled \$694 million, falling short of plan by \$261 million or 27%. Returns were \$460 million or 40% of gross shipments. Desktop 95 license-type sales (including new maintenance paid under 16-bit Select contracts which allow a customer to upgrade to Desktop 95 products) amounted to \$431 million, exceeding plan by \$48 million or 13%.
- Gross revenue from DAD products, principally Office and Office Pro, totaled S383 million for Q96-4, exceeding plan by S91 million or 31%. This strong performance was mainly due to Select and New Maintenance revenue exceeding plan by S102 million. Macintosh based products continue to perform poorly against plan with revenue and licenses S15 million (48%) and 45,000 (29%), respectively, under plan for the quarter. On a year-to-date basis, these products were under plan in revenue by S55 million (38%) and licenses by 136,000 (19%). This was mainly due to slower than expected sales of Mac Office and license mix shifts to lower priced Academic and Maintenance.

ACTION PER PAGE (PRICE)

MICROSOFT CONFIDENTIAL - SS MS6 6000688 CONFIDENTIAL

> MS-PCA 1192549 CONFIDENTIAL

- Gross revenue from Personal Operating Systems
 Division (PSD) products was \$75 million during
 Q96-4 or 98% of plan. Year-to-date revenue from
 PSD products totaled \$600 million or 98% of plan.
 MS DOS and Windows 3.x sales volume
 continued strong and of exceeded plan by \$41
 million for Q96-4, \$159 million year to date. A
 substantial portion of this variance was Windows
 3.x New Maintenance which totaled \$33 million
 (573,000 licenses) for the quarter and \$107
 million (2,088,000 licenses) year-to-date.
- · Gross revenue from Consumer products totaled \$54 million for the quarter, 29% under plan, with substantially all product categories under plan. The New Business or "Titles" category was 63% under plan during Q96-4 and 22% under plan year-to-date, with lower than expected sales of key products such as Golf, Fury3, Cinemania, AutoMap, Bookshelf, and Encarta. Established Business was also under plan 16% and 7% for the quarter and year, respectively. Hardware was 9% over plan for the quarter but 2% under plan yearto-date. Total Consumer product revenue decreased 6% from the same quarter in the previous year, while year-to-date revenues have grown \$24 million (9%) from the previous year. Hardware revenue year-to-date grew S39 million (35%) year over year, while software revenue decreased by \$15 million (8%).
- Gross revenue from BSD products totaled \$156 million during the quarter, 127% ahead of plan, due to strong sales of Windows NT (Workstation, Servers and Client licenses), the BackOffice bundle product, Exchange and courseware. Improvements in overall client/server ratios (compared to both budget and prior year) also contributed to the positive variance versus plan. BSD revenue year-to-date exceeded plan by \$224 million or 101%. BSD revenue during Q96-4 grew 183% compared to the same quarter last year and FY96 revenue grew \$267 million or 150% compared to prior year.

- Gross profit margin during Q96-4 was 89% of net revenue compared were to plan of 82% due to lower standard product costs from higher than planned mix of CD versus disk product (38% plan compared to 54% actual CD mix) and lower than expected scrap and rework costs as adequate scrap provisions for Desktop 95 returns were charged in the periods the product was sold into the channel. Additionally, the Desktop 95 reserve of \$142 million and the associated cost of revenue of \$10 million which was reversed in Q96-4 had the effect of reducing cost of revenue as a percent of revenue and improving gross profit margin. On a year-to-date basis, gross profit margin exceeded plan by nearly 1% of net revenue and improved over the prior year by 2% despite the large scrap charges taken in connection with the Desktop 95 returns described previously.
- Direct operating expenses were over plan by \$1.3 million during the quarter primarily due to negative variances in travel & entertainment, training, and supplies expenses partially offset by positive variances in infrastructure and other costs. On a year-to-date basis direct operating expenses were under plan by \$25 million or 9%, with people costs \$11 million or 6% under plan due mainly to lower than planned headcount and outsourcing costs.
- Q96-4 net marketing expense of \$147 million was \$72 million (96%) higher than plan. On a year-todate basis, marketing spend totaled \$403 million or 14.8% of net revenue compared to plan of \$383 million (14.8% of net revenue) and approved spending of \$405 million. Broad Reach spending totaled \$28 million or 3.7% of net revenue in Q96-4, and \$99 million for the year compared with plan of \$91 million.
- Q96-4 net PSS costs totaled S61 million which was on plan for the quarter.
- Responsibility margin for FY96 = as 49.6% or 4.5% higher than FY95 and in dollar terms grew \$524 million or 63%.

EUROPE FINISHED GOODS REVIEW Region Highlights

- At the end of Q96-4 the Central Europe region was reorganized into 3 separate regions Germany, Switzerland/Austria and Eastern Europe. The Regional Directors of the 3 regions now report directly to Michel Lacombe, VP Europe. The reorganization is aimed at focusing management attention on growth opportunities in Eastern Europe and managing the more difficult market conditions in Germany and Austria. In addition, at year end an Internet and Developer Customer Unit was formed at the EHQ to target the Internet opportunity in Europe.
- During Q96-4 an Eastern Europe Headquarters group was formed in Munich to better manage growth in the region. The region is planning to grow revenue to over \$120 million in FY97 and plans to open new subsidiaries in Romania and Croatia.
- The overall economic situation in Germany continued to worsen evidenced by increasing unemployment and budget cuts in the public sector. The German economy is not expected to recover dramatically within the next 12 to 18
 months and both private households and enterprises are expected to cut their expense budgets.
- Late in Q96-4, ESCOM, a major German OEM
 with a significant European retail presence,
 entered bankruptcy proceedings and is in the
 process of being liquidated. MS claim is for \$5.9
 million of outstanding accounts receivable and
 approximately \$13 million of unbilled, unreported
 OEM shipments. The prospects of recovery are
 low and this amount is fully covered by reserves.
- A large anti-piracy campaign began in France, in association with the BSA, to target the Small Organization market with 10,000 phone calls and 100 raids planned. The program is reinforced by an advertising campaign
- Gross finished goods revenue in Europe totaled \$404 million for Q96-4, 12% below plan mainly due to lower than expected sales of Windows 95 and Consumer products.
- For the year, gross FG revenue in Europe totaled \$2.2 billion, 7% over plan and 46% over FY95, although on a local currency basis gross revenue was only 2.5% over plan. Positive revenue variances were due to Desktop Apps New Users (\$148 million over plan) and Business System New Users (\$76 million), partially offset by

- weaker than planned revenue from Windows 95 (\$142 million under plan).
- Remaining Desktop 95 channel reserves of \$81 million reversed during the quarter, with \$11 million in general sales returns reserves identified for any additional returns of Desktop 95 products.
- Q96-4 gross revenue in the UK totaled \$104 million, 10% over plan, due to strong sell-in of Office, Office Pro and BSD products. For the year, UK revenue was \$448 million, 6% over plan and 43% better than FY95. Revenue from DAD products was 19% over plan, growing 33% over FY95. BSD revenue ended the year 29% above plan due to strong sales of Windows NT and BackOffice servers, with year over year growth of 167% in terms of revenue and 221% in terms of licenses.
- Q96-4 gross FG revenue in France was 10% below plan at S68 million due to high returns of Windows 95 during May and June. Before these returns, France would have finished 4% over plan due to a successful spring promotion of DAD products. Windows 95 penetration in Enterprise accounts is estimated at only 10% but is expected to grow to 30% in FY97. BSD revenue was 38% over plan in the quarter and grew by 100% over last year. For the full year, gross revenue was \$440 million, about as planned and 27% better than FY95.
- Gross revenue in the Southern region of Europe (Spain, Portugal, and Italy) was \$45 million, 9% over plan despite \$3 million in returns of Windows 95. BSD revenues were strong and included an important BackOffice win with the Italian Postal Service (4,500 servers and 13,000 clients). Portugal finished the quarter 22% below plan due to lower than planned upgrades to 32-bit applications by Enterprises and strong pressure from the competition with regard to prices and marketing campaigns. Gross revenue for the year totaled \$248 million, 25% and 54% over plan and last year, respectively.
- Q96-4 gross revenue from the Central region (Germany, Austria and Switzerland) was 29% below plan at \$102 million. Despite the negative environment, the German subsidiary finished the year 4% over plan and 50% over FY95. Austria and Switzerland followed the same negative trend during the quarter with gross revenue 17% and

> MS-PCA 1192551 CONFIDENTIAL

25% below plan, respectively, but finished the year 2% and 4% over plan.

- Due to S2 million in Windows 95 product returns in the quarter, Eastern Europe's gross revenue finished 16% below plan. For the year, gross revenue was \$93 million, 24% over plan and 69% over the previous year. Distribution infrastructure continues to develop in the region and desktop market shares are above 80%, but piracy rates are still very high.
- Gross revenue both in the Benelux and Nordic regions was negatively impacted by high returns of Windows 95 and was 24% and 10% below plan for the quarter respectively. For the year, gross revenue in Benelux totaled \$159 million, 12% over plan. Nordic ended the year 6% over plan with \$257 million in revenue.
- Cost of revenue in Europe as a percentage of net revenue during Q96-4 was 12.4%, one and a half points better than plan. Higher than planned CD-

FAR EAST FINISHED GOODS REVIEW

Region Highlights

- The release of the localized versions of Windows 95 in Q96-2 added to the continued adoption of Windows as the standard platform in the Far East. The Windows penetration rate (all versions of Windows on Intel PC shipments) in the Far East increased to 88% in FY96, up from 67% in FY95. Q96-4 Windows 95 FG revenue was \$14 million, 6% of total FG revenue. For FY96, Windows 95 revenue was \$104 million, 11% of total FG revenue.
- Momentum from the Japanese, Hangeul, and Traditional Chinese language versions of Office 95 launched during Q96-2 contributed to continued strong sales across the region in FY96. Simplified Chinese versions of Windows 95 and Office 95 were launched in the PRC in March. The localized versions of Office Pro 95 with Access 7.0 were shipped to distributors and resellers in late March and Q96-4. Gross FG revenue from Desktop products in Q96-4 was \$142 million. 21% above plan. Revenue from Desktop products for FY96 was \$570 million, representing 58% of total FG revenue.
- Japan finished the year as the second largest subsidiary after the United States with gross FG revenue of \$866 million. Year over year gross FG revenue grew 109% in local currency due to high PC sales along with the continued adoption of Windows and the introduction of Office 95

ROM mix and a more favorable license mix offset by higher than planned program and processing costs were the main drivers of this positive variance.

- Controllable expenses were 10% above plan for Q96-4 primarily due to marketing expenses which were 28% over plan. On a year-to-date basis and before foreign exchange impact, marketing expenses were 3% below plan.
- On a year-to-date basis, responsibility margin for Europe was 59.1% of net revenue, well ahead of plan of 55.8% and the previous fiscal year of 53.1%
- With the exception of Eastern Europe and the Southern region, Europe is forecasting very little growth for the next twelve months. The FY97 plan anticipates 10% growth in gross revenue at constant dollar rates and 4% at budgeted dollar rates. Responsibility margin is planned to increase slightly to 59.6% due to more favorable costs of revenue.

products. MS Japan contributed 13% of Microsoft's worldwide FG revenue in FY96 up from 10% in FY95.

 PC sales in Japan grew by 62.3% in FY96 over FY95 driven by lower prices of PC's and software, and easier to use systems. Estimated PC sales (units of Intel CPU's) by quarter are as follows:

> Q96-1 1.232.000 Q96-2 1,448,000 Q96-3 1.638,000 O96-4 1.479.000

- Microsoft has a majority market share in Japan for office suites with Lotus Office and Ichitaro Office for Windows as the second and third leading suite products. MS Excel is the leading spreadsheet, but faces competition from Sanshiro for Windows and Lotus 1-2-3 for Windows. Ichitaro for Windows is the leading word processing program.
- With approximately 50% of all Windows 95capable PCs shipped in Japan bundled with word processing or spreadsheet software, MS's strategy in Japan is to aggressively pursue bundling Japanese version of 32-bit Excel and Word with all OEM's. Word and Excel unit sales which are

COADENTAL

MS-PCA 1192552 CONFIDENTIAL

- recorded in the finished goods channel, represent approximately 31% of this segment with an average revenue per license of S49 each.
- In Q96-4 Microsoft started full operations in the PRC by engaging a Chinese company to manufacture Simplified Chinese language products in Shanghai and completing the installation of a financial accounting and billing system in Beijing. Sales and marketing offices were opened in both Shanghai and Guangzhou in FY96.
- Q96-4 gross FG revenue for the region was \$237 million, 24% above plan. Q96-4 net FG revenue of \$288 million was 57% above plan and slightly above Q96-3 net FG revenue of \$285 million. FY96 net FG revenue was \$948 million, 39% above plan and 82% over the prior year.
- In spite of high software piracy, net FG revenue in China during Q96-4 totaled S4 million (54% over plan), an increase of 72% over Q96-3.
- Net FG revenue in Taiwan increased in Q96-4 to S9 million and was 29% above Q96-3 net revenue.
 For FY96. net FG revenue was S29 million, slightly below plan in US dollars, as a result of economic uncertainty and political unrest occurring earlier in the fiscal year.
- The US dollar continues to strengthen relative to the Japanese Yen, with the average exchange rate going from 93.4 Yen per US dollar in Q96-1 to 105.6 Yen in Q96-4. In Q96-4, gross FG revenue in local currency was S82 million over plan offset by unfavorable foreign exchange variance of S36 million. Controllable expenses for the region in Q96-4 were over plan by S33 million, reduced by a S10 million favorable foreign exchange variance.
- Net FG revenue in Q96-4 reflects the reversal of the S56 million reserve for Desktop 95 inventory, as only normal stocking levels of inventory remain in the channel at year-end.
- Local language versions of Windows NT 3.51 and SQL Server 6.0 were shipped in Q96-3. The sellin of these products continued in Q96-4. Gross FG revenue from Business Systems Division products in Q96-4 was \$36 million, 19% over plan.

- Consumer products revenue for Q96-4 of S11 million was 13% over plan mainly due to strong sales of hardware (S6 million) and Entertainment products (S3 million).
- Developer revenue was \$24 million. \$6 million over plan due principally to strong sales of Visual Basic and C++ products.
- Cost of revenue for Q96-4 was 10.7% of net revenue versus plan of 17.9%. The majority this favorable variance resulted from increased CD mix which totaled 72% of product versus plan of 29%. The reversal of the channel inventory reserve also had a 1% favorable impact on cost of revenue for the quarter.
- People expenses were \$1 million above plan in Q96-4 primarily due to additional headcount approved at mid-year reviews, accrual of management incentives and other liabilities. Net PSS costs were slightly below plan in Q96-4, with the shortfall in PSS recovery income being offset by reduced costs. The MCS practices in the region are in a start up phase in FY96: and in Q96-4, net MCS costs slightly exceeded plan as a result of delays in hiring consultants.
- Net marketing expense was \$31 million in Q96-4, \$21 million over plan. Net marketing expense for FY96 was \$78 million, \$16 million over plan before the favorable foreign exchange impact of \$9 million. During the year, \$4 million of additional spending was approved for Internet related products. \$10 million for the Word/Office campaign in Japan, and \$1 million for the introduction of Exchange.
- Responsibility margin for Q96-4 was \$188 million or 65% of net FG revenue versus a plan 57%.
 Responsibility margin in Q96-4 was aided by the reversal of the \$56 million channel inventory reserve. Responsibility margin for FY96 was \$618 million or 65% compared to plan of \$336 million or 49%.

ICON FINISHED GOODS REVIEW

Region Highlights

- During Q96-4 ICON was reorganized into six geographies representing the key business opportunities for the region. Australia and New Zealand were combined to form a new South Pacific Region; a new South East Asia group was created based in Malaysia incorporating the ASEAN nations. India became an independent territory allowing focus on the growth potential there. Similarly, Brazil became a territory separate from Latin America. The Africa, Mediterranean and Middle East region (AMME) headquarters moved to London to co-locate with the UK subsidiary. Finally, Latin America was more accurately renamed Spanish America.
- Distribution issues in Brazil continue to limit the subsidiary's ability to generate revenue. Stream closed its manufacturing and distribution operations in the Brazil after a year long trial failed to justify investment in the business. This setback can be attributed in part to their failure to establish regular customers other than Microsoft and general price inflation for paper and raw materials. This inflation has caused a significant portion of the publishing industry to choose to import their product rather than produce locally. As a result, MS product will be sourced directly from Canyon Park until a new manufacturing contract can be negotiated with a replacement local parmer.
- Following the bankruptcy of two other major distributors in Brazil early this year, a third, Solaris, entered protracted negotiations with shareholders and creditors which stretched through most of Q96-4. Amounts due from Solaris are considered at risk although MS Brazil has booked sufficient reserves to cover it's exposure. This continuing issue however constrains growth in this market.
- Negotiations are continuing with two multinational distributors to enter the Brazilian market in early FY97. Microsoft will retain exclusive software distribution rights for a period of time in return for cash loans, repayable over a period of time and based on the distributors' success in the markeplace.
- New offices in Saudi Arabia and Egypt are now fully staffed and operational. These add to new subsidiaries that were opened earlier in the year in the Philippines. Indonesia, Vietnam, Costa Rica

- and Guatemala. Further additions in FY97 will include Kenya and Ivory Coast.
- Q96-4 gross revenue in ICON totaled \$173 million, 103% of plan and growing 43% over last year. This increase was driven by strong volumes of licensed product in Australia which finished the quarter 24% better than plan.
- Hebrew and Arabic versions of Windows 95 were finally released during the quarter, significantly behind schedule. As a consequence, both Israel and Middle East subsidiaries failed to meet revenue plans for FY96.
- Product mix in Q96-4 was beavily oriented soward
 products in the Desktop Applications Division.
 Increased license revenue particularly benefited
 Office, New User and OfficePro, Existing User,
 which were both significantly above plan.
 Continued strong volumes in the Business Systems
 Division across a range of products was offset by
 lower than planned Windows 95 sell-in.
- Controllable expenses increased in Q96-4 by \$10 million compared to Q96-3. Increased marketing expenses to improve sell through of Windows 95 and the annual Latin American trade show in Miami in June accounted for \$5 million of the growth. Year end bonuses, late hiring, additional travel and bad debt expenses accounted for the remainder of the increase.
- ICON ended FY96 with responsibility margin of 51%, 3 percentage points better than plan and 5 points better than FY95. Year over year growth was driven by a 47% increase in revenue combined with a 2 percentage point reduction in cost of revenue. Operating expenses during the year grew 34%, although excluding marketing costs, expenses grew 27%.
- For FY97 the ICON region has budgeted revenue growing 27% to \$753 million with a two percentage point improvement in responsibility margin to 54%. Ninety-six new heads have been approved for FY97 primarily focused on the key growth markets of India & Southeast Asia.

Business Highlights

- FY96 gross revenue of \$2.71 billion was 38% better than plan and grew 65% over FY95. Q96-4 revenue of \$741 million continued the quarterly growth trend seen throughout the year. These results are due to PC unit growth, faster than planned conversion to Windows 95 which bears higher royalty rates, increase in sales to \$\text{Small Systems Builders (\$\text{SSBs}\$), and licensing of more non-O\$ products.
- Net OEM revenue of \$2.65 billion was 29% of total MS revenue, up slightly from 28% in FY95.
 Contribution margin of \$1.93 billion was 73% of net revenue and represented 47% of total MS

contribution margin. excluding those channels still in investment mode.

- FY96 Mouse sales totaled 12.3 million units. 5% over budget. Although under budget, Q96-4 Keyboard sales of 152,000 units were 68% greater than in Q96-3.
- Q96-4 Cost of revenue of \$21 million was under budget due to reduction of the keyboard obsolescence reserve in light of improved sales.
 FY96 Cost of revenue as a percent of net revenue was below plan largely due to lower than planned keyboard sales.

- Rapidly changing technology, price cuts leading to narrow margins, and stiff competition are negatively impacting some hardware manufacturers and leading to channel consolidation.
 NEC purchased an interest in Packard Bell, Siemens Nixdorf purchased interests in Escom.
 which announced bankruptcy in June, and Vobis, and Samsung increased their funding of AST.
- Multinational PC companies continued to gain maket share worldwide, generally at the expense of local middle-tier companies, as can be seen in the slower growth of the Named Account segment. Compaq. Dell. and Gateway 2000 each have established a significant presence in Europe and the Far East.
- The Small Systems Builder (SSB, also known as Delivery Service Partner, or DSP) channel revenue

- doubled to \$375 million from FY95. This channel and OEMs selling directly to end users are expected to grow the fastest in FY97.
- In a successful quest to gain market share from NEC and Apple, Fujitsu sharply cut prices in the Japanese market. Both NEC and Fujitsu reported strong Windows 95 shipments. In one year, Fujitsu has grown from being OEM's 72^{ac} largest revenue producer to the 9^c.
- After a slow start, IBM began shipping significant volumes of Windows 95 in Q96-4. Windows 95 carries a much higher royalty rate than Windows 3.1. If these shipment trends continue, IBM has the potential of being a \$200 million customer in FY97.

Public Network Sales (formerly AT Sales) Highlights

- Prepaid fees for three of the nine ISDN Wizard license agreements were received during the quarter and deferred pending receipt of royalty reports for confirmation of the actual number of site licenses sold. Total amount deferred in Q4-96 was approximately \$750.000.
- On June 4th and 5th, PNS sponsored a Network Operator Briefing simultaneous with Microsoft's announcement of the "Normandy" product as a platform for commercial internet and on-line services. The event was attended by 210 teleco, cable, ISP and on-line service customers and feedback was extremely positive.
- The PNS team worked closely with IPTD in negotiating the CompuServe strategic alliance, which was announced on June 4th. Under the agreement, CompuServe will be the first customer to deploy Normandy to run its CompuServe Information Service, and SPRYNET. CompuServe and Microsoft further agreed to offer access to CompuServe services in Windows 95 via an icon in a desktop folder that will connect users to either

the CompuServe Information Service or WOW!. CompuServe will market, promote and distribute Internet Explorer as its primary browser for the CompuServe online services.

- FY96 controllable expenses were below plan primarily due to marketing spend which was delayed due to the reorganization of AT Sales and Consumer Systems Division during the fiscal year.
 Q96-4 controllable expenses were above plan due to accruals for June reimbursements for year-todate travel and marketing events held late in the year. Year-to-date, these expenses were as planned.
- In FY97 the PNS business model will include revenue from the sale of specific Microsoft products for commercial use by named PNS accounts such as large telecommunication, cable, ISP or on-line service companies and sold by the PNS sales force. Internet Explorer, Normandy, ISDN, and MSN Access are expected to be the main contributors to planned PNS revenue of \$23 million.

MARKETING EXPENSE REVIEW

ï

- Net worldwide marketing expense for the quarter was \$255 million, an increase of 83% from Q96-3 and an increase of 37% from Q95-4. This increase reflects year-end accrual of committed dollars and the clean up of old invoices.
- No region exceeded approved marketing spend although the worldwide FG total exceeded budget by 5%.

Business Initiatives

 A new consulting management system from Axiom was implemented in the UK at the end of June and went fully operational July 1. France,

Business Results

- Q96-4 net revenue exceeded plan by \$4 million due primarily to increased use of subcontractors.
 FY96 MCS revenue totaled \$162 million compared to plan of \$146 million. Of the total, 68% was generated by MCS consultants and 32% from subcontractors.
- Subcontractor revenue was \$8 million above plan for Q96-4 with related subcontractor expenses exceeding plan by \$11 million. MCS utilizes subcontractors to meet business objectives and to meet demand that can not be fulfilled with existing resources.

Germany, Italy, Mexico and the Far East are all scheduled for implementation early in FY97.

- FY96 contribution margin was a loss of \$2 million compared to a planned loss of \$7 million. North America contributed \$6 million to the margin which was offset by losses in Europe, ICON and Far East of nearly \$3 million each. Subcontractor use contributed \$10 million to the FY96 contribution margin, \$8 million occurring in North America.
- Worldwide MCS headcount grew 63% during FY96. North America with total headcount of 550, ICON with 109, and Far East with 26, were all below plan while Europe at 248 heads was over plan.

Business Highlights

- As a percent of net FG revenue, net PSS costs were 6.8% versus plan of 7.7% and 7.4% in FY95.
 Net PSS costs for the FG channel totaled \$437 million for the year, 2% below plan. Gross PSS costs of \$539 million were 10% below plan largely due lower than planned support incidents. PSS revenue of \$102 million was 34% below plan also due to lower than plan fee-based incidents.
- Support incidents were less than plan due to a number of factors including the impact of new support policies, product mix, and product improvements which reduce the number of incidents per unit.
- In Q96-4. General Electric purchased a Premier Global agreement to support its worldwide implementation of Exchange. This annual agreement represents \$1 million in support revenue and provides worldwide mission critical support to GE.
- Premier Watch, a new Windows NT remote monitoring service was implemented. Premier Watch trees the Internet to monitor critical customer servers 24 hours a day and delivers targeted analysis of server performance and availability. Key goals of this new offering center

- around achieving higher levels of system availability and performance from Windows NT and BackOffice applications.
- Domestic Premier customer satisfaction grew to an all-time high in Q96-4. Overall Premier satisfaction was 97%, with 62% of those customers indicating they were very satisfied.
- Online support services were expanded to include NNTP newsgroups on the Internet allowing customer-to-customer discussions about Microsoft products. Accordingly, direct support via CompuServe was discontinued effective April 20°.
- For the second year in a row. Microsoft AnswerPoint earned the "best of category" award for excellence in the Service and Support Provider (Software) category in PC World Magazine's annual poll of a diverse panel of 2.000 experts.

- Total general and administrative costs include functional corporate cost centers that support MS on a worldwide basis such as legal services, corporate finance, and IT project development, and certain expenses to support domestic headcount departments such as employee benefits, facilities costs. infrastructure operation, and administrative services.
- For financial reporting, the latter costs are distributed to domestic product, sales, and administrative groups and included in people and infrastructure expenses as general, building and grounds costs. For internal management reports, the remaining net corporate G&A costs are allocated to the channels and product groups as part of corporate allocations.
- ITG costs, include application development, regional support, and distributed infrastructure costs. These costs are driven primarily by demand from supported organizations for new technology and tools, support of existing systems, and sales increased demands on the corporate WAN and telecommunications network.

- Human Resources costs are driven primarily by employee headcount. Allocated expenses include recruiting, employee development, payroll, and stock administration. Distributed HR costs include domestic employee benefits such as health insurance, 401(k) match, and health club dues.
- MS Services group provides administrative support including building services, library services, mail, food and beverage, administrative procurement, travel services, and copy centers.
 These costs are driven by user demand and are indirectly correlated to headcount growth.
- Real Estate & Facilities costs include allocated functional costs related to facilities planning and development that are driven primarily by growth in domestic headcount and distributed infrastructure costs such as depreciation, rent, utilities, and maintenance which are driven by the number of employees and contingent staff using MS facilities.
- Finance, legal, and executive costs are corporate functional groups supporting MS on a worldwide basis

INFORMATION TECHNOLOGY

- ITG application development costs were \$12 million over plan in Q96-4 primarily due to consulting costs in excess of plan and approved variances on certain projects like SAP and Channel Measurement. Infrastructure costs were about \$1 million below plan for the quarter. For the year, ITG application development costs were \$18 million over plan, while infrastructure costs were under plan by \$7 million.
- During Q96-3, IT application development responsibility and resources were moved to the functional business units allowing them to directly manage development projects and to assume P&L responsibility for project costs. However, financial information is captured to consolidate all business unit IT costs under a "virtual" ITG division for comparability with prior periods. In FY97, IT development costs will be reported as part of the business unit expenses as well as on a consolidated basis.

Major Development Projects

Project	Actual	Plan	Status
MS Product	\$3,487	\$2,714	Implemented Metaphase package June 96: BOM Config/Release milestones completed June 96
Web Response	2.321	2.831	Version 1.6 scheduled for release in August 96
Compass	3.032	1.806	Version 3.4.10 moved into production
MS Manager	3,340	1.770	MS Manager 4.0 scheduled for release in February 97
Channel Measurement	4,752	4.061	MS Sales 3.0 in Beta
SAP	7,471	2.375	G/L (phase II) rolled out July 96
Genesis	3,690	4.950	ASN programs moved into production: Master Planning to be complete July 96

- The current phase of MS Product consolidates information for OEM products, MS Press, Marketing parts, Far East products, and MSN into the system. This phase also integrates this system with other systems such as Infobase.
- Web Response provides corporate and home endusers an electronic means for requesting service via MSN. Also includes customer front-end tools for MSN, billing interfaces to MSN and issue router functionality to escalate or transfer issues between sites.
- Compass is a support tool for ECU replacing the current SR/Man tool. The new system will enhance product support service delivery from a quality and efficiency standpoint for major Microsoft customers.
- MS Manager is a cross-functional application that
 is distributed across North America. ICON, FE,
 and Europe. It supports PSS, account
 management, and direct marketing activities in
 the subsidiaries in which it is deployed. Manager
 centralizes a significant portion of customer data
 in a central data warehouse.

- Channel Measurement will provide an integrated view of worldwide channel data, including purchases., and inventory of Microsoft's channel partners, giving users the ability to analyze the effectiveness of sales and marketing programs, representatives, and channel activity.
- SAP financial software is being implemented on NT and SQL Server worldwide to replace the current ROSS, subsidiary MacPac, and Platinum accounting systems with a central corporate general ledger. SAP will also provide an integrated administrative procurement system and fixed asset ledger for worldwide use. The domestic implementation of the procurement, fixed assets and general ledger is complete. During FY97, the international rollout will be substantially complete.
- Genesis is a tool to re-engineer the North American Supply Chain by moving CPC from a "push" model to a "pull" model for replenishment and just-in-time production through better forecasting and coordination of suppliers and distribution channels.

REAL ESTATE & FACILITIES

Worldwide Facility Distribution & Capital Spending

(\$ in millions, square feet in thousands)

	Facilities Distribution		0	96-4 Capital S	pend	FY96 Capital Spend				
Location	Square Feet	Mix	Actual	Plan	Variance	Actual	Plan	Variance		
Puget Sound	4,370	57%	\$41.5	\$40.0	(\$1.5)	\$201.4	\$293.9	\$94.0		
Other Domestic	1,186	16%	8.3	3.2	(5.1)	19.8	19.1	(0.7)		
International	2.068	27%	16.5	0.9	(15.6)	61.2	34.7	(26.5)		
	7,624	100%	\$66,3	\$44.1	(\$22.2)	\$282.5	5347.7	\$65.2		

- Worldwide space capacity is now over 7.6 million square feet. There were no additions in Q96-4.
- Construction of Buildings 30, 31, and 32 on the northeast corner of the Campus was commenced during the quarter. These buildings are expected to be occupied in Q97-3. When completed, the buildings will add 365,000 square feet to the portfolio and capacity for 1,500 people. The total cost of this project is \$116 million, with the majority of the spending to occur in FY97.
- Site work on the Augusta project located between Building 22 adjacent to SR 520 and the south west section of the main campus began in July 96. By Q98-3, this S184 million dollar project will add 566,377 square feet to the portfolio. Additionally, a building permit for the 415,415 square feet Troon project has been obtained. Troon will be located next to Augusta.
- **Puget Sound Capital Spending**

	YTD	YTD	1
	Actual	Plan	Variance
Committed Projects	\$111.6	\$138.6	\$27.0
Tenant improvements	38.7	70.6	31.9
Furniture & Fixtures	15.8	15.2	(.6)
New Construction	25.4	46.6	21.2
All Other	9.5	22.9	13.4
Total	\$201.0	\$293.9	\$92.9

 FY96 capital spending is below plan primarily due to timing lags between actual and plan. FY96 capital spend for the Puget Sound region was on committed projects (like Redmond West and Building 27), tenant improvements on new sites

- Construction of the Thames Valley Park project in the UK was begun in July 96. The construction site can be monitored real-time through the MS intranet at http://wsh-01-web/finadm/ltdfacil/waichtvp.htm. Total cost at completion is expected to be \$49 million.
- Tenant improvements were started on the Canyon Park Data Center in June 96. This leased 32,000 square feet building will provide server and telephone expansion for ITG. Work is expected to be completed during Q97-4. Total cost of this project excluding ITG equipment is \$24 million.
- Tenant improvements for MS Studio commenced in June 96. Completion is expected in Q97-3 and total costs are estimated at S22 million.
- Building 28 adjacent to Buildings 26 and 27 in the southwest section of Campus will cost approximately \$31 million and will add another 100.000 square feet to the portfolio.

and existing buildings (like remodeling of buildings 1-6 and the ITG data center) and new construction. New construction represents Campus projects expected to occur through FY98. When completed, these buildings will add over 1.5 million square feet to the existing Campus portfolio. As noted above, construction began on the first set of buildings in July 96. As building permits are approved, the remaining projects will start in FY97 subject to executive approval and space needs. Total capital spending on these projects is estimated at \$600 million over the next three years.

- Distribution costs are categorized as service costs to the company where the distributing group controls the unit cost and the receiving business unit drives unit consumption. For example, Human Resources manages benefit costs per person, but increases in company headcount drive total benefit costs.
- Distributed ITG infrastructure expenses are under plan Q96-4 and year to date primarily due to a \$2.3 million positive variance in depreciation and amortization as a result of actual capitalized purchases lagging plan. Contract labor is over plan in the computer operations and network services group, but is partially offset by lower payroll costs due to lower than planned contractor to employee conversions.
- Distributed HR costs were over plan in Q96-4 and at plan for the year primarily due to product group recruiting costs. Product group hiring has been significantly higher than anticipated by the recruiting group although per head recruiting costs were as planned.

- Distributed MSG costs were over plan for FY96
 primarily due to plan overruns in the copy center
 and for supplies procurement. User demand
 exceeded plan even though unit costs are below
 plan. The negative amounts in the company store
 and travel represent the impact of store profits and
 travel rebates respectively.
- Distributed real estate costs were 90% plan for the year primarily due to lower housed headcount than planned, depreciation costs related to lower than planned and lagged capital spending, and lease income from Cascade Place not anticipated in the FY96 plan. Additionally, utility costs were lower than plan due to lower than expected headcount and below normal water usage on the sports fields as a result of the Windows 95 launch last August. Supplies and equipment costs are over plan for Q96-4 and year to date due to a ergonomic furniture retrofit program completed this quarter.

- Cash and short-term investments increased less than 3% as strong cash flow from operations was largely offset by investments in long-term assets and purchases of Microsoft stock. Stock purchases for the quarter totaled \$490 million.
- Net accounts receivable continued to decline from a peak of \$1.05 billion in Q96-1 reflecting payments on accounts with extended terms related to the Desktop 95 launch.
- Other long-term assets reflect investment in MSNBC and Mtel, partially offset by a \$16 million reduction in the value of publicly traded equities.
- Unearned revenue totaled \$560 million at June 30, 1996 and includes \$425 million of revenue deferred under GAAP on sales of operating system products. Other unearned revenue consists primarily of maintenance contracts.

- Continued strength in economic indicators during Q96-4 led investors to anticipate rate increases by the Federal Reserve and push market interest rates higher.
- Market interest rates matching the maturities of the MS Family of Funds rose during the quarter. Specifically, six month US Treasury Bill yields rose 16 basis points to 5.4%, three year US T-Note yields rose 40 basis points to 6.3%, and five year US T-Note yields rose 41 basis points to 6.5%.
- Portfolio durations were positioned at levels below equivalent fund benchmark durations due to anticipated increases in market interest rates.
- All Family of Funds portfolio returns exceeded their respective benchmarks for the year. The longer duration Short-term and Intermediate funds, which represent 43% of the portfolio, outperformed their benchmarks by 203 and 290 basis points, respectively.
- The Strategic Opportunity Portfolio which represents about 3% of the total portfolio delivered an annualized return of just under 10% during the quarter. Returns on many of the securities included in this fund are linked to the performance of MS stock which increased about 6% during the quarter.

- Worldwide gross accounts receivables declined to S955 million from S1.17 billion at the end of last quarter as collection efforts were expanded to include resolution of all remaining excess Desktop 95 products either by payment or return credits.
- Worldwide DSO continued to improve during the quarter moving from 51 days at the end of Q96-3 to 40 days as extended term agreements related to the launch expired and regular contract terms were again in place.
- Select and MOLP receivables continued to increase and totaled S322 million, or 34% of total receivables, up from S302 million (26% of total) last quarter. The current portion of these

receivables improved to 62% as compared to 42% at the end of last quarter.

- Reserves for sales returns decreased from \$615 million to \$458 million as channel inventories continue to decline to normal levels.
- The bankruptcy of two major distributors in Brazil resulted in a S6.8 million write-off during FY96. Solaris, another distributor in Brazil, is also having financial difficulty resulting in an additional S5.2 million exposure which has been fully reserved. Negotiations are under way with Tech Data to facilitate their entry into Brazil during Q97-1 which will help strengthen the local distribution channel.

- Total accounts receivable for the top ten worldwide customers accounted for 38% of the total at June 30, 1996, down from 42% at the end of Q96-3. This decrease reflects both major reductions in receivables from Ingram, Olivetti, and Computer 2000 due to resolution of Desktop 95 inventory issues, and a small increase in revenues from the top three accounts, Tech Pacific, Merisel, and Ingram.
- More than 50% of the over 60 day aging is related to GT Interactive. More strict enforcement of their 180 day contract terms has resulted in S6 million of product returned in June leaving S16 million past due at June 30, 1996. An additional return of S3.5 million will be processed in July and GTI has agreed to pay the remaining past due amounts.
- Merisel continues efforts to sell all or part of their worldwide operations to raise needed capital.
 Merisel has maintained their account on a current

- basis to insure continuity of shipments, payment of rebates and marketing allowances.
- Amounts due from Ingram-Micro, Microsoft's largest distributor, totaled \$46 million at quarter end, down from \$140 million as remaining issues with Desktop 95 inventory have been resolved.
- Amounts due from Packard Bell were current at the end of June, with \$24 million paid on July 3rd. However, they still represent a significant risk to MS as their usage reports continue to be late and payment terms are net 90 days compared to net 30 days for most other OEMs. A new contract, including payment terms of net 60 days, has been negotiated and is pending signature. NEC has assumed a major role in the Packard Bell operations and will in all likelihood control the financial future of this troubled company by the end of FY97. Packard Bell continues to pay interest charges for all late payments, and since 1994 has paid over \$3 million in late charges.

a) Valuation includes 1,388,888 shares of Liberty Media.

 Excludes MS's 1.4 million warrants infittel, 1.1 million of which have certain performance requirements, with an estimated current market value in excess of \$5 million.

- Total financial assets include equity and equityrelated investments. MS maintains allowances to cover operating losses and declines in the estimated value of non-public investments and mark to market adjustments for publicly traded investments.
- Total market value of investments in public companies increased \$180 million during the quarter, primarily due to a significant increase in the stock price of UUNet.
- Intellectual property rights represent purchased code or other intellectual property and rights. IPR costs in excess of \$1 million are capitalized and

amortized as a product development cost over periods averaging about two years. IPR increased S3 million during the quarter, reflecting new purchases including Exos (\$4 million) and eShop (\$40 million), offset by write-offs of Colusa (\$12 million) and Aspect (\$12.5 million), and the retirement of fully amortized IPR totaling \$15 million.

 Long term loans and other increased primarily due to a \$250 million investment in Quadramics, a financial services company.

Highlights of Current Investments (See Appendix for additional details)

- The MSNBC 24 hour news cable and interactive online joint ventures were launched on Monday, July 15. The cable JV was launched with approximately 21 million subscribers, including recent agreements with Cox, Adelphia, Time Warner's Philadelphia region and other small MSOs to distribute the MSNBC channel. Investment in MSNBC at Q96-4 reflects \$41 million funding for the Cable JV and \$9 million for the Interactive JV, offset by MS share of operating losses of \$13 million and \$9 million, respectively.
- The HP-SCO relationship continues to make progress with plans to deliver a 64-bit version of Unix for the P7 platform by mid-1998. Both companies have committed large development teams with 200 people from SCO and 350 people from HP on the project. At present, MS intends to maintain its investment and royalty contracts with SCO.
- On April 29, UUNET entered into a merger agreement with MFS Communications Company, Inc. (MFS). Under terms of the agreement, UUNET will become a wholly owned subsidiary with each of its shares exchanged for 1.777776 shares of MFS common stock. This deal was valued at \$1.98 billion or a 37% premium over UUNET's market value. Upon completion of the merger, Microsoft will receive 7.4 million shares of MFS stock with a current value of about \$237 million and will hold a 4.1% interest in the combined companies. UUNET, MFS and MS intend to continue the existing Network Agreement without modification except that MS will no longer make advances for equipment purchased under the Equipment Loan Agreement after the effective date of the merger.
- MicroUnity is facing severe financial problems and is expected to run out of operating funds before July 31 unless additional financing can be obtained. MU closed its fab plant on July 2 and its board is evaluating the possibility of splitting the

- company into two entities, one focused on chips and software for cable data and the other focused on development of media processor architecture. MS is currently working with other preferred investors on a proposal to restructure MU.
- Individual announced an agreement to acquire FreeLoader, Inc. for 1.8 million shares and \$2.0 million in cash. FreeLoader is a developer of an online web delivery service which repeats predefined searches of the world wide web on a regular schedule.
- Lightspan expects to raise \$20 million in August, 1996, \$10 million from a new investor and \$10 million from existing investors.
- Metricom postponed a \$75 million convertible debt offering citing weak technology stock prices.
 Currently, Metricom has about \$41 million in cash and short term investments on-hand.
- Academic Systems has installed its Interactive Mathematics software on 16 college campuses as of March 31, 1996 and released its Interactive Mathematics software for Windows in May 1996.
- DreamWorks Interactive will ship its first five titles this fall. Cyberchef, Chalktalk and Goosebumps, Escape from Horrorland will ship on September 18th and Movie Maker and Neverhood will ship on October 18th. A distribution agreement with Microsoft is close to completion under which MS will receive a fee for distributing DWI titles. To date, MS has contributed \$11.45 million to DWI and will have contributed \$15.8 million by the end of Q97-1. DWI revenue is projected to be \$6.5million in CY96 and \$41.5 million in CY97.
- As of June, 1996 Vanstar had hired 174 systems engineers, with 119 achieving MS Certified Systems Engineer status. To date, MS has provided Vanstar with \$10 million in marketing development funds.

New Deals

Electric Gravity, Inc.

 On May 23, 1996, MS completed the acquisition of Electric Gravity, Inc. Electric Gravity is the developer of the Internet Game Zone, a site for multi-player games such as chess and bridge. The Internet Game Zone will be available to all Internet users with MSN members receiving special benefits.

eShop Inc.

- On June 20th. Microsoft acquired eShop Inc. in a share-for-share exchange valued at \$40 million. eShop is the developer of eShop Technology, a merchandising and shopping system that enables merchants and hosts to build internet and online commerce operations.
- The next version of eShop Technology, eHTML, integrates with standard HTML browsers and provides improved wallet, payment, and merchandising features. Microsoft will ship Tandem Computers Inc.
- On May 1, 1996 Microsoft and Tandem signed the NonStop ServerWare for Windows NT Server Funding and Development Agreement under which Tandem will extend its high-availability, fault-tolerant transaction processing and database products to the Windows NT Server platform.
- Microsoft will provide Tandem S35 million to fund development of these products over the next six quarters, repayable through a royalty on sales of Tandem products. In addition, Microsoft

Entex Information Services, Inc.

- One June 24. 1996, Microsoft and Entex signed the Microsoft Office and BackOffice Infrastructure Agreement. Under terms of this agreement, Entex will deploy a dedicated team of 150 technicians offering consulting, integration and support services for Microsoft products.
- To fund this effort, Microsoft loaned Entex S8.1 million, to be repaid on a fixed schedule over six years.

 The transaction was structured as an asset acquisition for \$975.000 of MS stock plus assumption of \$25,000 in liabilities. Penny options worth \$2.2 million will also be granted over 3 years to the two founders who have relocated to Microsoft.

eHTML as Microsoft Merchant 1.0 in early FY97-4

- The company also operates eShop Plaza. an Internet shopping mall. MSN will work with eShop Plaza merchants to transfer their offerings to MSN.
- Twenty eShop employees are relocating from San Mateo, CA to Redmond. Twelve have joined IPTD, and eight have joined MSN.

purchased an at-the-money option to buy one million shares of Tandem stock for S11.24 each in exchange for S5.7 million.

- The companies also signed a Patent Cross License, a Cluster Code License and Development Agreement, and a Marketing Agreement that obligates the parties to each spend \$12 million over four years to promote the relationship and the NonStop ServerWare for Windows NT Server products.
- Microsoft also received a warrant to purchase 75,000 Entex common shares, which represents about 15c of the company, at a strike price of \$72.
 Entex is privately held and intends to go public in late 1996.

RISK MANAGEMENT & HEDGING ACTIVITIES

Stock Options Grants and Exercises

- MS stock traded at an average price of \$114.83 during Q96-4. The highest closing price during the quarter was \$125.00 and the lowest closing price was \$101.125.
- In Q96-4 the number of stock option transactions was 6,929, an increase of 59% over the same period in FY95. The number of shares exercised was 5.3 million, a 29% increase from Q95-4.
- During Q96-4, 790 stock option grants were issued, totaling 1.15 million shares. Of this total, 606,000 shares were dated in Q96-4, with the balance dated in prior quarters due to overlapping window periods.
- Cumulative outstanding options on 6/30/96 totaled 119.1 million with an average price of \$44.14.
 Authorized but unissued options totaled 187 million.
- A total of 338,440 ESPP shares were issued for the six month period ending 6/30/96 to 10,680 domestic employees at a purchase price of \$76.29 per share. International ESPP is reported in odd numbered quarters.

Put Warrants

- At quarter end, 13 million put options were outstanding, with strike prices ranging from \$95-\$104, and an average strike of \$99.85. Maturities range from 6 to 18 months. Life-to-date program proceeds total \$173 million, \$17 million of which represent put options that have expired. Incremental premiums of \$29 million were earned during Q96-4, bringing the total earned in FY97 to \$124 million.
- This program has enhanced the buyback program by reducing life-to-date stock buyback cost per share by \$2.95, from \$52.24 to \$49.29.
- To recognize the amount that would be required to purchase all 13 million shares at their put option strike prices, a liability of \$1.3 billion would be required as an offset to retained earnings; this liability was reduced to \$635 million by selling "capped puts" which limit our liability to the difference between the \$99.85 average strike price and the "caps" of \$51 per share.

Foreign Exchange Hedging

- The dollar strengthened 2.6% versus the major European currencies during Q96-4, trading between a range of 1.48DM/s and 1.55DM/s. The dollar similarly strengthened 2% versus the Japanese yen during Q96-4, trading between a range of 105Y/s and 110Y/s.
- In Q96-1, Treasury bought foreign currency put options to hedge Microsoft's total forecasted FY96 foreign exchange denominated net cash flow

Insurance Renewals

 Most property and casualty insurance coverage was renewed on July 1. Coverage in most insurance areas remained the same, however,

- exposure of \$1.3 billion. The financial instruments used were average rate put options for seventeen different currencies. Microsoft realized a net gain on these contracts of \$5 million in Q96-4 and \$14 million for the year.
- Treasury also has a continuing program to actively hedge the monthly exposure to foreign currencydenominated accounts receivable on a short-term rolling 30 day basis.

some insurance programs were significantly restructured with substantially increased limits and deductibles.

TXAG 0014540 CONFIDENTIAL

Consolidated Errors & Omissions Liability Insurance

 Microsoft has historically maintained errors & omissions (E & O) insurance for software and electronic products and for print publishing. With the addition of MSN in Q96-1 a third E & O program for network related liabilities was added. To improve program efficiency and to reduce

MSC 00569013

AUTHOR: BRENT CALLINICOS (BRENTCA)

HIGHLY CONFIDENTIAL

MICROSOFT CONFIDENTIAL - T11
MS6 6000716
CONFIDENTIAL

MS-PCA 1192577 CONFIDENTIAL conflicts among insurers in the event of a "media convergence" claim, all E & O coverages on July 1 were consolidated into a single catasurophe risk program covering both professional E & O and content related risks. Microsoft's software E & O, publishing E & O, and MSN network E & O insurance programs were discontinued with the inception of the new consolidated E & O policy.

 A Microsoft developed insuring form was used for this first ever consolidation of technology media risks by the commercial insurance market. The policy form is flexible enough to accommodate additional media exposures, such as broadcasting, as Microsoft's business continues to change. The

Global Property Insurance

On July 1 Microsoft's domestic and international property insurance programs were merged into a single global program. Under the global program, Chubb insurance will provide worldwide coverage with a \$5 million primary coverage limit. Several insurers will share an "excess' limit of \$250 million each loss above the Chubb policy. The policy deductible increases from FY96 levels (\$100,000 US and \$10,000 International) to \$1 million each claim. Based on past loss experience, the nearly \$1 million in global insurance premiums saved will more than cover the expected losses below the increased deductible. Total cost for FY97 is approximately \$1.4 million versus FY96 cost of \$2.1 million.

Excess Liability Insurance

 Catastrophe liability coverage for bodily injury and property damage situations was increased from \$100 million to \$200 million each loss. Primary exposures driving the need for an increase were high profile public marketing events and tenant

Domestic Casualty insurance

 This program includes primary general and automobile liability and interstate workers compensation. Continued adverse liability claims experience caused Hartford, the incumbent insurer, to significantly cut back on coverage and increase retentions on the general liability program. At the same time, claim service in the

Global Automobile Insurance

 The global automobile program entered its third year on July 1. As planned, the program transitions to a retrospectively rated program for FY97, meaning subsidiaries who manage their consolidated E & O program provides a total coverage limit of \$75 million, subject to a deductible of \$1 million each claim or \$5 million in an annual period. The annual premium for FY97 is \$1,295,000. This compares to expiring limits of \$10 million for software E & O; \$5 million for publisher's E & O and \$10 million for network related claims, with deductibles of \$100,000

to \$500,000 each loss and a combined premium of approximately \$1 million. There is a \$25 million umbrella limit in addition to all of the limits indicated in this section. Thus, the total consolidated E & O limit is \$100 million, the expiring software E & O limit was \$35 million, etc.

• The global program provides several significant coverage enhancements. Puget Sound earthquake limits are now \$250 million (increase of \$50 million); coverage for Japanese earthquake is now \$35 million (an increase of \$25 million); coverage for Puerto Rico earthquake is now \$25 million (an increase of \$10 million); and coverage for California earthquake is now \$15 million (an increase of \$10 million). Coverage was also broadened for direct and contingent business interruption risks.

legal liability risk associated with occupancy of leased facilities. Premium for the added \$100 million in coverage was \$100K, the industry minimum.

workers' compensation area was not meeting MS requirements. For these reasons MS changed from Hartford to Kemper Insurance. Kemper provided the best combination of price, coverage form, and service. Total premiums for this program for FY97 are \$685K versus FY96 premiums of \$885K.

automobile fleet experience will receive premium savings and those who do not will receive surcharges. There are approximately 1.100 automobiles in the program worldwide.

Employment Practices Liability Insurance

 A catastrophe liability insurance program is under consideration for employment related risks discrimination, wrongful termination, harassment, etc. The commercial insurance market for this risk has matured considerably in recent years, with substantial limits available at competitive premiums. The primary exposure for MS is a class action employee lawsuit, meaning a high limit, high deductible program will be pursued.

Selected Summary of Insurance and Limits Insured

- Domestic and international property \$250 million each loss, subject to earthquake sublimits of \$35 million Japan; \$25 million Puerto Rico; and \$15 million California. (Several increases in earthquake coverage over FY96—\$50 million Puget Sound, \$25 million Japan; \$10 million Puerto Rico and California).
- Domestic and international business interruption -\$250 million each loss.
- General, umbrella and excess liability—\$200 million each occurrence (\$100 million increase over FY96).
- Software errors and omissions liability—\$100 million each claim (\$65 million increase over FY96).

- Publisher's errors and omissions liability—\$100 million each claim (\$65 million increase over FY96).
- Network media and broadcasting liability—\$100 million each occurrence (\$65 million increase over FY96).
- Fiduciary liability—S25 million each claim (\$10 million increase over FY96).
- Employee fidelity (Crime)—\$25 million each loss.
- Special indemnity (K & R)—\$100 million each occurrence (\$50 million increase over FY96).

Additional Areas of Risk Financing Under Review

 Risk management continues to look at efficient methods for financing intellectual property (patent infringement), corporate reimbursement for directors and officers, and credit accumulation risks. A captive insurance company is under continuing review. Simultaneously, alternatives to a captive which afford greater tax and financial accounting benefits than a captive are also under review.

- Murnal fund managers Fidelity and Janus were the
 top two buyers during the quarter, taking the
 opportunity to buy after MSFT's strong Q96-3
 earnings release. The Magellan fund has yet to
 come back into the stock, although there is wide
 spread speculation that the fund will again start
 purchasing tech stocks based upon the past
 performance of its new manager, Robert Stansky.
- Momentum player Phoenex Home came into the stock for the first time in Q96-4, purchasing nearly a million shares. Based upon this investor's profile, this position will most likely be sold off by the end of Q97-1.
- Morgan Stanley Asset Management was the number one seller of MSFT during the period, as Morgan's top technology analyst, Mary Meeker, removed MSFT from the strong buy list based upon price. Most of the sell off came from retail investors.

Short Positions

- Short interest in MSFT shares increased by less than one percent during June in contrast to the better than 5% rise for the Nasdaq. Large cap technology companies continued to show substantial increases in their short positons during the month with Cisco leading all Nasdaq issues with a greater than 25% increase.
- It should be noted that outstanding short positions represent under two days average trading volume.

COMPETITOR HIGHLIGHTS

Oracle

- Oracle released May quarter and fiscal year earnings per share of \$0.40 and \$0.95 compared to prior year results of \$0.27 and \$0.66, respectively.
 May results beat analyst consensus estimates by \$0.02 and overcame suggestions that sales in the database market were cooling down. Some analysts believe the company has made efforts to prevent a significant shortfall in first quarter earnings similar to prior years.
- Oracle held their Intranet Strategy briefing on July 16th. Key highlights were:
 - WebServer 3.0 a technology that links Web servers to large transaction-oriented databases and enterprise applications.
 - InterOffice collaboration software, including email, scheduling, and workflow.
 - Features in Designer/2000 for the Web and Developer/2000 which facilitate the transition of client/server applications to corporate Intranets.
 - ConText a search engine which searches and summarizes using SQL.
 - Video Server a plug-in which enables realtime streaming of video content over an Intranet.

Novell

- Novell commented that the rise of the Internet and Windows NT create opportunities to promote its NetWare Directory Services (NDS) and other administrative and management services that are bundled in NetWare. Over the next year, Novell will deliver NDS on NT and UNIX platforms and is making plans for NDS for the Internet with native support for open Internet standards and protocols.
- Analysts are very cautious about Novell's future prospects with an anticipated 20% decline in revenues in the second half of 1996 due to the sales of the UNIX business to SCO and the personal productivity business to Corel, and the rise of Windows NT. On a positive note, migration of customers to NetWare 4.1 and the repurchase of shares, approximately 23 million shares through the first six months of 1996 and board approval for 37 million shares, are seen as restricting the stock's downside.

- Web Request Broker a development platform which will interoperate with Web servers from Microsoft, Netscape, and others.
- Analysts viewed Oracle's positioning of their Intranet solutions as extensions of their database expertise positively, however, they do not anticipate any significant near term revenue gains.
- Analysts expect Oracle to continue increasing their market share in the RDBMS server line by stealing share from Sybase and they foresee 60% compound annual growth in the enterprise resource planning (ERP) applications market for the next few years. Oracle has a 21% market share in the ERP market.
- Raymond J. Lane was promoted to the new post of president and chief operating officer and he will head a 10-member committee of top managers that will have some influence over product development. Larry Ellison will retain ultimate authority over product development.
- Oracle claimed to beat Microsoft and Netscape to market with the first browser, PowerBrowser 1.5, to offer support for both Java and Basic scripting.
- In July. Novell announced availability of GroupWise WebAccess, a product that allows users access to their Universal In Box via the Internet and any HTML 1.0-compliant Web browser, Novell InnerWeb Publisher and NetWare Web Server 2.5, which allow users to publish, access and manage information on corporate intranets and the Internet, and NetWare Client 32 for DOS/Windows, which provides 16-bit DOS and Windows 3.1 desktop users with full 32-bit access to NetWare services.
- Announced an expansion of their strategic alliance with Hewlett-Packard to deliver complete networking solutions to customers in small to medium-sized businesses, enterprise, and Internet/intranet services markets. HP can now ship any or all of Novell's products on its NetServer family of PC servers.

MICROSOFT CONFIDENTIAL - 11

MS6 6000722 CONFIDENTIAL

> MS-PCA 1192583 CONFIDENTIAL

Sun Microsystems

- Excluding charges of S0.23 per share related to the acquisition of Integrated Micro Products, Sun reported June quarter revenues of \$2.02 billion and earnings per share of \$0.85 compared to year earlier results of \$1.64 billion and \$0.63, respectively. Fiscal 1996 results showed revenues of \$7.1 billion and earnings per share of \$2.65 compared to year earlier results of \$5.9 billion and \$1.81, respectively. Sun's results exceeded analyst estimates by \$0.01 per share with orders and backlog also exceeding expectations.
- Analysts are encouraged by Sun's sales of UltraSPARC powered Enterprise servers and software which has driven and should continue to drive operating profit margins up. Also, HP's delay in shipping servers based on the PA-8000

IBM

- IBM's earnings of \$2.51 per common share for the June quarter declined compared to \$2.97 in the prior year due to a drop in memory prices and foreign currency exchange rates. Results exceeded consensus estimates by \$0.07 and the stock closed up \$11.88 after the announcement. Software revenues increased 4% over the prior year to \$3.2 billion.
- The most cumbersome remaining restrictions of the 1956 Consent Decree with the Justice Department will be lifted in approximately 6 to 8 months when the settlement is signed. Parts of the decree were lifted in January. Certain less cumbersome restrictions on the AS/400 and S/390 businesses will remain in effect for 4 to 5 years. Analysts expect the settlement to have a significant impact on IBM's top and bottom lines.
- With the expiration of a five year non-compete agreement with its spin-off, Lexmark International Inc., IBM announced re-entry into the low-end printer market. Analysts say IBM's four new models are competitive with those of Lexmark and industry leader Hewlett-Packard.
- IBM and Sears sold Prodigy to International Wireless Inc., a closely held telecommunications investment group for an estimated \$250 million in cash and securities.
- Lotus announced plans with PointCast Inc. to develop an information delivery system based on Lotus Notes, Lotus' Domino server, the Internet and PointCast technologies. The system will enable corporations to broadcast personalized news directly to users' computer screens within an intranet

HIGHLY CONFIDENTIAL RISC chip until late 1996 is expected to help Sun stay ahead of HP without aggressive pricing.

- Some analysts expect Java licensing agreements and affiliated products, such as just in time compilers and other tools needed to develop Java applications, to generate meaningful revenue over the next couple of quarters. They also expect Java chips, a set of CPU chips set to be rolled out over the next year that will run the Java language in native mode, to be a catalyst for significant change in network computing. They believe Java chips will facilitate the construction of the "thin client", a computer on a network that needs little in the way of system administration or special treatment in contrast to the higher maintenance PC.
- IBM expanded its licensing agreement with Netscape to include server software from the Netscape SuiteSpot family and Netscape Commercial Applications for AIX, and IBM plans to bundle Netscape Navigator on its RS/6000 servers.
- Dataquest reported that Lotus SmartSuite's share
 of the worldwide suite market grew to 20.1% of
 unit shipments in Q1 1996, up from 15.4% in Q4
 1995, while SmartSuite's share of revenues
 declined from 8.1% to 6.7% during the same
 period. The share shifts reflected increased
 bundling of the product by IBM.
- IBM is having trouble keeping up with the rapidly growing demand for CD ROMs in its notebook PCs, which (like certain other vendors) require proprietary CD ROM drives. A CD ROM shortage has developed for its ThinkPad series and has become a bottleneck on sales for that line. For the industry as a whole, IDC reports that last year only 6% of notebook PCs in the US shipped with CD ROM drives but that CD ROM-equipped notebooks will increase to almost 45% of US notebook shipments this year.
- IBM expects to launch an Internet-based shopping plaza named World Avenue with approximately 20 retailers in the fall. For a 5% commission. World Avenue allows retailers to avoid the technological burden of constructing Internet sites while benefiting from cross traffic between mall stores.

Netscape

- Announced June quarter revenues of \$75 million. a 34% increase over the March quarter, and earnings per share of \$0.01. Excluding charges of S0.06 per share for the acquisitions of InSoft, Inc., Paper Software Inc., and Netcode Corp., June earnings exceeded analyst estimates by \$0.01 and March earnings by S0.03. Analysts were surprised by the sequential server revenue increase despite a 60% price cut at the end of the March quarter. Many analysts significantly raised their 1996 and 1997 estimates following the release.
- Analysts believe Netscape's future success is dependent upon continued dominance in the browser market and aggressive acquisition of client/server technology through strategic alliances or outright acquisitions. Navigator is viewed as Netscape's "Trojan Horse", providing them a presence in 92 of the Fortune 100 companies. However, analysts assume any loss in Netscape's claimed 38 million Navigator user base or desktop market share would have a ripple effect

· Michael Cowpland, Corel Corp. chief executive officer, said he expected retail figures in June would show Corel ahead of Microsoft in the suite market (retail sales represent about 15% of the overall suite market). Corel recently released its 32-bit suite, with channel fill inflating retail sellin figures. He also said he hopes to garner 25 to 30 percent of the overall word processing "suite" market in the next three to four months, chiefly at the expense of Microsoft.

- throughout Netscape's product line, not just the browser, and would significantly impact revenues.
- Netscape hosted an Internet Calendaring Summit on July 24 to develop a set of Internet calendaring protocols to be submitted to the Internet Engineering Task Force (IETF), an Internet standards body. Approximately 20 companies attended, including Lotus, Hewlett-Packard, and
- During the quarter product releases included SuiteSpot, a suite of server software for use on intranets, Netscape FastTrack, a server for users creating their first Web sites, and the Navigator 3.0 and Navigator 3.0 Gold betas. Final release of the two Navigator products is expected in September. SuiteSpot reseller relationships and/or strategic partnerships were announced with Hewlett-Packard, Compaq. Digital Equipment, EDS, IBM, Sun, and others.

- a) AST anticipates a restructuring charge of S10-S15 million and a reduction in force approximating 1,000 employees over the next year. Samsung Electronics, 49.9% owner of AST, has placed one of their executives as AST's chairman.
- b) AST's lower than expected results were due to product development issues and pricing pressures.
- Apple's trailing twelve months reflect an after-tax inventory writedown of \$388 million and restructuring charges of \$130 million after-tax.
- d) Apple's current quarter includes a S39 million after tax gain on the sale of their investment in America Online.
- c) Compaq's trailing twelve months include a S241 million, or S0.87 per share, charge for purchased inprocess technology in connection with the acquisitions of NetWorth and Thomas-Conrad Corp.

Net Income	\$2.830	28%	\$2,195	25%	29%

- Net revenue adjusted for GAAP is budgeted at \$10.1 billion, a 17% increase over FY96 and includes a planned net deferral of \$279 million related to unearned operating system revenue.
- Cost of revenue is planned for 12% of net revenue decreasing from 14% primarily due to changes in license mix and lower finished goods costs. Finished goods CD media mix is planned to increase to 61% from 58% in FY96.
- Research and development spend is budgeted for \$1.77 billion, an increase of 24% over FY96. As a percent of net revenue R&D spend is planned to increase to 17.5% versus 16.5% in FY96. For GAAP reporting, R&D spend excludes investments in the MSNBC and DreamWorks joint ventures which are shown as non-operating items.
- Budgeted sales and marketing costs total 52.77 billion, an increase of 4.3% over FY96.
 As a percent of net revenue, sales and marketing expense is planned to decrease to 27.4% from 30.6% in FY96.
 - Sales expenses are planned to total \$1.23 billion or 12.1% of net revenue as compared to \$1.16 billion or 13.4%, in FY96.

Aumo≈ Bos Dos (BDos)

- Marketing expenses are planned to increase 7.6% to \$1.09 billion. Broad Reach spending is planned to total \$111 million, a \$65 million decreases over FY96.
- PSS expenses are planned to decrease to 4.5% of net revenue as compared 5.6% in FY96, with costs totaling \$457 million, a 6.4% decrease over FY96.
- General and administrative expenses are planned to decrease to 2.9% of net revenue from 3.6% in FY96, primarily reflecting certain ITG business unit costs now included in cost of revenue and sales and marketing.
- Worldwide headcount is planned to grow 16.3% to 23,904 by the end of FY97.

- All regions are planning slower growth compared to FY96 due to a combination of factors, including the Windows 95 bubble, the strengthening dollar, lower PC growth, a conservative pricing assumption, and continued worries about saturation in the Desktop Applications business. This is offset by continued strong growth in Business Systems and renewed growth in the Interactive Media Division (formerly Consumer) business, particularly for games on the Windows 95 platform.
- Responsibility margin is typically budgeted to decrease year over year due to conservative revenue assumptions and optimistic assumptions about the timing of new hires. However, FY97 is forecasted to have improved responsibility margin due to continued improvements in gross margin, improvements in PSS efficiency and slight reduction in marketing as a percent of net revenue. The improved profitability will allow for

- an increased investment in product development, which is expected to exceed S2 billion in FY97.
- Sales and marketing headcount growth will be moderate with no headcount being added in North America. Europe will add 28 heads primarily in the growing markets of Italy, Spain and Eastern Europe. An additional 200 heads are being added in Far East and ICON, primarily in Japan, PRC, India and South East Asia. In addition, approximately 225 MCS heads will be added worldwide.
- The table on the following page contains a excerpts of market size data points from the "yellow book", a summary of various data points consolidated during the budget process. The data points are defined below and copies of the yellow book can be obtained by contacting the Corporate Planning on the corpplan alias.

FG Net Revenue per person is MS revenue divided by the population of the sales area served by that substitutely. Committee with high piracy and/or low GOP per person tend to have lower not revenue per person.

FG Rev per PC is MS act revenue divided by the number of new Issel PC's estimated shipped into that country. This number is a good measure of purery and effectiveness of MS sales and marketing programs.

Installed PC been per person represents the total number of Intel PC's in somery (exchaing obsolete maximum) divided by the population. This number gives an influence of the retireve size of the current market for software as well as industries of growth potential.

- The revenue summary is management's standard view of gross revenue, licenses, and revenue per license which allows both a channel and product division perspective of sales in a single report. Revenue summary reports product revenue on an "as shipped" basis, that is, how a customer buys product from MS. For example, Excel is sold both as a stand-alone product and bundled as part of Office.
- In the Revenue Summary Report, Excel sold as part of Office is reported as Office sales, but Excel sold as a stand-alone product is reported separately. Conversely, for purposes of measuring product divisions, revenue is "unbundled." For example, Mail is a component of Office, but development occurs in the Business Systems Division, thus associated revenue for Mail is attributed to BSD rather than Desktop Applications.
- Additionally, the revenue summary segregates new users from existing users for Desktop Application products. Segregating users allows channel and product division management to track sales of new licenses versus upgrades.
- The table above reconciles the revenue summary shown in the Microsoft Results section with the product division P&Ls shown in the Product Division section. The primary reconciling item between Desktop Applications and BSD represents the unbundling of Mail from Office. Other reconciling items above include manuals, promotional copies of software, raw materials, and recurring maintenance which are shown as "other" in the revenue summary but included as specific product division revenue in product P&Ls. These items are reclassified in the revenue summary in order to report meaningful revenue per license information.

THE MICROSOFT FAMILY OF FUNDS

During Q95-4, Microsoft's cash investment portfolio was migrated into five distinct sub-portfolios - four fixed-income portfolios and one opportunity portfolio. Each portfolio is a separate mutual fund or risk bucket, with unique guidelines and risk/return expectations. Collectively, the portfolios are the Microsoft "Family of Funds".

With this strategy, MS is increasing the sophistication of our portfolio management efforts, focusing on Total Rate-of-Return portfolio management (as opposed to yield-to-maturity) and using duration as a risk management tool (instead of term-to-maturity).

The goals of this strategy are to:

- Segregate the cash portfolio into individual funds of a more manageable size.
- Enhance the total return on Microsoft's Cash assets.
- Establish risk and return expectations for each Fund.
- Provide pro-active risk management of financial assets.
- Benchmark performance relative to market indices.
- Allow allocation of cash among the various risk segments of the short-term fixed-income market.

Following is a high level summary of the general guidelines of each Fund:

 Level 1: Money Market Fund-Designed to meet the operating cash requirements of MS Corporation, and other legal entities, MS MBV, MB IBV, and MS Puerto Rico, this fund has a targeted duration of 20-45 days and a maximum maturity of 91 days. Little principal value fluctuation is expected. Benchmark: 30-Day US Treasury Bill.

- Level 2: Enhanced Money Market Fund-Designed as a secondary source of liquidity supporting the Money Market Fund, this fund has a maximum maturity of 13 months. The longer targeted duration of 2-6 months, will provide opportunity for increased return with a modest increase in risk. A small amount of principal value fluctuation is expected. Benchmark: 90-Day US Treasury Bill.
- Level 3: Short-term Fixed Income Fund-This fund will carry an increased focus on interest rate changes, security sectors and temporary market anomalies to provide the opportunity for returns above money market rates. Duration is further extended to a target of 1.25 to 2.25 years. Some principal value fluctuation is expected, and negative monthly total returns may occur occasionally. Benchmark: Merrill Lynch US Treasury 1 2.99 Yr. Index.
- Level 4: Intermediate Fixed Income Fund-An actively managed portfolio with a targeted duration of 2.5 to 4.0 years. This "short bond fund" will focus on the optimal security type, sector, and credit risk to achieve superior returns. Principal value fluctuation is expected. Months with negative returns will occur and an occasional negative quarter is possible. Benchmark: Merrill Lynch US Treasury 3-4.99 Yr. Index.
- Level 5: Opportunity Fund-This fund will seek investment opportunities that provide yield enhancement, meet tax-planning objectives, and mirror Microsoft's strategic investments and business relationships. This fund requires senior management approval of each transaction, and does not carry specific maturity constraint.

INVESTMENTS

Wang Laboratories, Inc.

(Financial information shown below is the most recent available.)

	Fiscal Year Ended Jun. 30, 1995	Fiscal Year Ended Jun. 30, 1996	Change S	Change %
Net revenue	· \$947	\$1,090	\$143	15%
Operating expenses	1.014	1.087	73_	7%
Operating income (loss)	(67)	3	70	· NM
Other income (expenses)	6	(4)	(10)	NM
Net income	(\$61)	(\$1)	\$80	NM

- Wang continues to expand as a service provider and a developer of open systems software for NT. A smaller portion of revenues now comes from support for its terminated proprietary products. For the fiscal year ended June 30, 1996. net revenue increased 15% with service revenue increasing 24% and product sales growing 1%. EBITDA increased 65% from \$83 million to \$138 million
- On July 24, Wang announced it had signed an agreement to acquire I-NET, a provider of outsourced network and desktop management services, for \$167 million. It is hoped that this combination will enable Wang/I-NET to become a premier provider of seamless IT outsourcing services from the desktop through local and widearea networks to the Internet. I-NET is expected to add over \$300 million in revenue to Wang in fiscal year 1997.
- Last year, MS signed a broad technical, service, marketing, patent, and investment agreement with

Wang. Under the agreement, Wang's desktop imaging and object controls are incorporated in certain MS products. Additionally, the two companies are working together on the definition of work management APIs. Wang's structured workflow technology manages the routing and delivery of this data and documents. MS also designated Wang as its "preferred" vendor of imaging and workflow software and is engaging in co-marketing. The agreement also expands Wang's role in providing outsourced support services for MS products.

 MS also purchased S90 million face amount of 4.5% convertible preferred stock due in 2003 for S84 million. The stock is convertible into Wang common at S23 per share and represents ~10% of Wang's common stock on a fully diluted basis.
 Wang's common was recently trading at ~S18 per share, up from S13 per share at the time the deal was signed, but down from a high of S24.

Mobile Telecommunications Technologies Corporation (Mtel) (Financial information shown below is the most recent available.)

	Six Months Ended Jun. 30, 1995	Six Months Ended Jun. 30, 1996	Change S	Change %
Net revenue	\$107	\$169	\$62	58 %
Operating expenses	101	169	68	67

	(15)_	(62)	(48)	323
Net income	(59)	(863)	<u>\$42</u>	580

 Mtel is the leading provider of nationwide and alpha-numeric paging services under the SkyTel brand. Mtel is also developing SkyTel 2-Way, which has caused a dramatic increase in operating expenses.

> HIGHLY CONFIDENTIAL

MSC 00569076

 Mtel recorded a year-over-year increase in net pager units in service of 57.5% to 1.29 million units. However, net units increased by only 53 thousand in the 2nd quarter due in part to a strategy of reducing units sold through lower margin and higher churn distribution channels. Quarterly operating cash flow from operations

AUTHOR: JEAN-FRANÇOIS HETZ (JEANF)

MICROSOFT CONFIDENTIAL - A35

TXAG 0014603 CONFIDENTIAL MS6 6000779 CONFIDENTIAL

MS-PCA 1192640 CONFIDENTIAL turned positive to \$4.4 million from negative \$8.8 million in the prior quarter in part due to improved cost control.

- Skytel's one-way revenue was \$79.0 million, an increase of \$26.8 million or 51% over the prior year. Quarterly operating cash flow from one-way operations increased to \$28.7 million, an OCF margin of 36.7%.
- The two-way business achieved several important milestones including a very favorable technical analysis by Lockheed Consulting, but units ended the quarter at only 24 thousand.
- John T. Stupka, formerly CEO of SBC's wireless business, joined Mtel as President and CEO. John Palmer remains Chairman.
- During the quarter, Mtel also completed several important financial transactions, including the sale of its stake in Mercury Paging, the sale of additional preferred stock and a consent solicitation to allow additional borrowing capacity under its bond indenture.

Stac, Inc. (Financial information shown below is the most recent available.)

	Six Months Ended Mar. 31, 1995	Six Months Ended Mar. 31.1996	Change S	Chance %
Net revenue	\$23.3	\$23.5	\$0.2	1 %
Cost of revenue	1.3	1.5_	0.2	13 *
Gross profit	20.6	20.5	0.0	(0)
Controllable expenses	23.3_	<u>26.6</u>	3.3	14
Net income	(\$2.7)	<u>(\$6.1)</u>	(\$3.3)	NM

- In June 1994, MS and Stac signed cross-license and investment agreements to end their disk compression patent dispute. MS agreed to pay Stac license royalties of S1 million per month for 43 months. MS also purchased S40 million of 4.0% convertible preferred stock, which was converted to common equity on November 9, 1995.
- Software accounted for under 40% of total revenue in the current quarter. Stacker, CD QuickShare and Replica are all well below plan. ReachOut hit

MSNBC

(Financial statements not meanintgul)

- The MSNBC 24 Hour Cable News joint venture and the interactive online news joint venture were both launched on Monday, July 15. The Cable JV was launched with approximately 21 million subscribers, including recent agreements with Cox, Adelphia, Time Warner's Philadelphia region and other small MSOs to distribute the MSNBC channel.
- The joint ventures call for a Microsoft investment of \$220 million for MSNBC Cable and \$2.5 million for the online services, both paid over five years. All profits or losses from the joint ventures are distributed or funded 50/50 by MS and NBC.

its budget, while the hardware business continues to exceed plan.

- Controllable expenses in the current six month period include \$12 million of purchased R&D.
 Before this charge, net income would have been \$6.1 million and EPS would have been \$0.20.
- At a price of \$10.125, MS's 4,458,746 shares of Stac common stock have a market value of \$45 million.
- The joint ventures will pay NBC a licensing fee of approximately \$26 million per year per joint venture for the first 5 years for the use of NBC assets. The licensing fees after 5 years is the greater of \$20 million per year per joint venture or an agreed upon percent of revenues.
- Total funding to date for the Cable JV has been \$41 million and for the Interactive JV has been 9 million. MS share of the operating losses of the Cable JV total \$13.2 and for the Interactive JV total \$8.8 million.

A36 - MICROSOFT CONFIDENTIAL

AUTHOR: JEAN-FRANÇOIS HEITZ (JEANF)

MS6 6000780 CONFIDENTIAL

MS-PCA 1192641 CONFIDENTIAL Santa Cruz Operation, Inc. (Financial information shown below is the most recent available.)

	Quarter Ended Mar. 31, 1995	Quarter Ended Mar. 31, 1996	Change S	Change %
Net revenue Cost of revenue Gross profit Controllable expenses Net income	\$53	\$51	(52)	(4) %
	13	12	(1)	(8)
	35	39	4	11
	30	36	<u>6</u>	20
	\$5	53	(52)	(40)

- Revenues in CY96-1 increased \$3 million compared to the previous quarter, in spite of \$7 million coming from Unixware. Operating expenses also increased by \$3 million, due to the staff coming from Novell (ex-USL). Cash was up \$8 million vs. The previous quarter.
- The HP-SCO relationship seems to strengthen; they plan to deliver a 64-bit Unix on the P7 by mid-1998 and are committing large development teams (200 people from SCO, 350 people from HP).
- At the SCO Enterprise Summit (April 23), SCO, Intel and 7 OEMs (Compaq, DG, ICL, NCR, Oliveni, Siemens Nixdorf and Unisys) announced

their intent to position and use SCO Unixware as the volume Unix server of choice.

- SCO also announced a joint development agreement with ICL and DG to incorporate DG NUMA technology into Unixware.
- SCO Doctor and Arc Serve (layered products) were shipped in June 1996.
- SCO won a 5.500 Unixware units deal at Chrysler.
- MS decided late June to keep, for the time being, its SCO shares, not to give up its board seat and not to sell its Unix royalties contract to SCO.

UUNET Technologies, Inc. (Financial information shown below is the most recent available.)

	Quarter Ended Mar. 31, 1995	Quarter Ended Mar. 31, 1996	Change \$	Change %
Net revenue Cost of revenue Gross profit Controllable expenses Net income	\$ 15.0	\$ 43.0 27.5 15.5 15.3 \$ 0.2	\$ 28.0 19.5 8.5 8.0 \$ 0.5	187 % 244 121 110 (167)

- On April 29, UUNET entered into a merger agreement with MFS Communications Company, Inc. ("MFS") pursuant to which UUNET will become a subsidiary of MFS and each UUNET share will be exchanged for 1.777776 shares of MFS. At MFS's closing price prior to announcement this amounted to \$1.98 billion or a 37% premium over UUNET's then current market value. As of July 15, the value of the transaction is \$1.83 billion. Microsoft will receive 7.4mm shares of MFS with a July 15 value of \$57.88 per UUNET share or \$237mm. MS will hold 4.1% of the combined companies.
- The merger will be voted upon by the shareholders of UUNET and MFS on August 9th and 10th, respectively. The merger requires an affirmative vote from a simple majority of the shares

- outstanding of each company. Stockholders representing 59.5% of UUNET's shares and 12.1% of MFS's shares have granted irrevocable proxies in favor of the transaction.
- UUNET, MFS and MS each intend to continue the Network Agreement without modification, except that MS will no longer make advances under the Equipment Loan Agreement for equipment purchased after the effective date of the merger.
 We have increased the size of the loan under this agreement from \$26mm to \$48.2mm to reflect additional spending prior to the merger.
- Analysts are generally bullish on MFS, projecting 10 year revenue growth rates in the 30% range.
- On July 11th, GTE and UUNET announced that GTE will resell access to the UUNET network via its \$19.95 per month consumer Internet service.
