should not have big-"R"'d that one, sorry.

I wanted to know if you want a specific mention of Novel in the Borland NDA. We are adding that to the WP NDA.

not sure what you're asking me. anyone at borland who is working on competitive os's should not have access to chicago. anyone at wordperfect who is working on competitive os's should not have access to chicago.

We can send to Borland now, as long as we do not need a Novel exclusion in that document. Bradsi ??

I'm confused about point #3. Why are we sending this to Borland? They work on supporting operating systems, not developing them.

As well, when can we send this out to Borland so they can sign it? For them to get interim Chicago builds and get on my Chicago CD, they need to get a build in order to get going.

Thanks!
