PROJECT: DR DOS Leopard Beta 2
DATE: May 13, 1990
REPORT NUMBER: #9

General

We have received the Beta 2C version, and re-testing is underway. We are looking again at the following products:

3Com 3+Share v1.5
IBM PC LAN v1.30
Multimate v4.0
Disk Optimizer v4.05
Print/Q v4.02
SideKick Plus v1.01c
Carbon Copy Plus v5.1
Lotus 1-2-3 v3.0
Ready! v1.00e
Crosstalk XVI v3.7b

We should be receiving Windows 3.0 on Monday or Tuesday. The version we receive will be the production version. While no ship date has been officially announced, Microsoft will be making some kind of announcement May 22nd. I am currently trying to find out which other vendors have products, either beta or production releases, which are designed for the Windows 3.0 environment, which we can acquire for testing with DR DOS.
