To Sue Nagrette, Henry Ward, Greg Swaid, Mike Ahart, John Brennan, Mike Shelton  
From Anthony Hay  
Date Monday 4th June, 1996  
Regarding A bug in the DR DOS Editor V2.0

DR Manseray  
DR Taylor  
DR Santa Clara  
DR Hungerford  
DR Hungerford

The bug

When editing an existing file which has no file attributes DR DOS EDITOR V2.0 will open the COM1 device instead of the specified file. If the user were then to save the file using Ctrl-X, Ctrl-X or Ctrl-Ks the original file would be overwritten.

The solution

Use the Editor on the EDC Bulletin board in EDITOR.ARC with password NODOSSES. Use the following POUND command line to always EDITOR.EXE from EDITOR.ARC.  
C:\>always -nobuqate editor

I have updated the disks in UK manufacturing with this fixed version of Editor. Sue Nagrette should be the same in the US.

NOTE ABOUT WINDOWS

Windows 3 will run in real mode under DOSSES but upper memory must be disabled using the new MEMMAX command with the following command line

MEMMAX -0
