Subject: fonts for Win 3.1 in apps
Date: Tue Feb 19 10:28:12 1991

was hoping to discuss with you lewis in our aborted meeting last week.

Will do this in our rescheduled meeting.

What is your thinking on this? Have you discussed with
Mikemap and BUMs?

This is for fonts that would ship with the app's and not Windows, at
least
initially. The idea behind this is to help "raise the bar" for our
competition. If all our apps have a ship set of fonts (in this case,
we are
talking about the full PS 35) that do not appear in Windows, someone
who buys
Aldus Persuasion or Word Perfect for Windows might want the same 35
fonts...

If the fonts ship in Windows, then MS app's have no font advantage over
any
other app.

That is our current line of thought on the topic.

/Dennis
