Subject: RE: Quick sync on Standards for DMD

This is a great start! I've made a few quick edits and added a column for "resources needed" as we look to FY '04 strategic plan. This is meant to be place holder for additional HC which needs to be assigned either within existing resources or as an addition to it. This part of the big ideas initiative I mentioned. I am coordinating the plan for all of NMPD in conjunction with Marlin Blizinsky of the corp. standards team (although I wonder if NMPD exists anymore with the reorg.?). I've attached a first cut draft from Marlin of "DMD" standards which was just reviewed with Amir and has some complementary info but needs a lot of work. I would ask you to think about the resource need within the activities you've outlined and enter it into the chart. I think will we eventually breakout initiatives within standards orgs and create an aggregate master document which I will put on the NMPD Standards Share. To my team please also add to this document. In DVD forum case, I know of at least 4 WG's that Kilroy is trying to track/drive. Thanks.

See-Mong – Your part looks great, thanks. I made a few minor modifications overall (see below). Let me know if you have any revisions.

Pat – I'm attaching a spreadsheet with info that See-Mong, Ian and I put together. It lists all the standard efforts that affect the product teams in Mike's org. Please feel free to modify if we are missing anything. Once we get your team's revisions, we can review the final version with Mike.

<< File: Standards-DMD-v12.xls >>
(Mike, Ming – just an fyi on the progress.)

Thanks, Jordi

MS-CC-RN 000001035872 HIGHLY CONFIDENTIAL Modifications over v11—added WMFT in M4IF, added CMPT in 3GPP and DBV since we are also pushing/supporting Mats/Tom with codec issues, converted names into aliases for consistency (although it could be done either way), & corrected minor typos

Here is my writeup. There are two lines I am not so up to date on, DVB and SMPTE.

Good. No need to meet then.

See-Mong -- I have updated the spreadsheet (attached). Once you are done with your part, we can just pass it to the standards team, Linda, etc. BTW, Mike wanted us to be clear on what the priorities mean, so I added a key to explain the meaning of P1, P2, and P3 at the top. Feel free to modify.

OSTA

UDF and

Compressed media disc formats

Is all I would add to the table you have. More of a negative involvement in standards than a positive.

-lan

When:

Friday, January 24, 2003 10:00 AM-10:30 AM (GMT-08:00) Pacific Time (US & Canada); Tijuana.

Where:

50/3600

Hi lan -- When we met with the standards team last week, MikeBeck asked See-Mong and I to go around and collect data on standards that product teams in his org are either attending or think we should attend. We are putting together the spreadsheet attached to summarize all the efforts and plan to present it to Mike some time next week.

<< File: Standards-DMD.xls >>

Mike suggested to meet with you to make sure we capture all the standards that your team cares about. You could also give us feedback on the spreadsheet format.

Alternatively, instead of having a meeting, I guess you could simply add some rows to the spreadsheet and pass it back.

	RIAA + IT industry Agreement Is ATSC Cable Labs harmonizing of the US Cable and Terrestrial middleware specs an opportunity to avoid some of Java's harm to us?
Lowlights	
	Still having great difficulty in TV- and cell phone-related standards orgs. Java continues strong in these industries No real product alternative to MHP.

Notes:

- Priority Level
 - A = critical effort in a competitive standards environment...
 - B = Stds org work is important to our Platform and may become an A in the next 1-5 years.
 C = Stds orgs decisions are unlikely to have a major impact on our platform business.

 - D = Stds org work is peripheral to our core business. We can gain information by staying involved, but have little or no interest in influencing the standards that the organization develops.

 MS Lead: Alias of the owner of Msft's relationship with this stds org.

 MS Position: possibilities include: member/officer/contributor/promoter founder

 Status: options will depend on category:

 Memberships: in process, renewed,

 - Contributions early draft, in review, approved, published

 Other issues: might include IPR issues, status change, competing standards, standards compliance
