proposal. Close for a schedule in reviewing this proposal
and a decision on implementing it.

Friday (4/26) 1pm
      Meet with Colin Powell and Ray Foster to discuss the
Micrografx Toolkit, positioning this kit with WLO, and PM
Engine changes planned for Cruiser.
Colin and most of his group are involved in all-day meetings
Tues through Thurs of next week.

> SteveB gave me a copy of the documnetation on this to look over.
> It is AMAZING to me what a good job your group has done mapping
> windows applications - I know we will keep finding boundary
> conditions and tuning for another year and thats impòrtant but
> I expected to find dozens and dozens more API mapping problems
> than you ended up with. In all the confusion about IBM and Os/2
> I hope your group knows they are doing a great job -- just for
> Microsoft alone to be able to provide Os/2 applications with
> very little development work makes WLO a great asset - I even think
> IBM will come back to us some day and want to work with us on it.
> Meanwhile keep tuning it and keep the ISVs that use it (inlcuding
> MS apps) happy. I have gotten positive fedback on WLO from a
> number of our apps groups - you may just get the bugs but people
> are amazed at how well it works.
