UNISYS

April 28, 1992

Dear Jan,

We just wanted to thank Tim Case for the extraordinary efforts he made to ensure that Microsoft would provide us with a DPML-compliant Windows 3.1 kernel. We understand that he went far out of your way to arrange this deal for us.

As a result of his actions, we will be able to support Windows 3.1 in Standard Mode on CTOS, allowing us to claim "better Windows than OS/2 2.0." This should provide us significant leverage in several critical accounts.

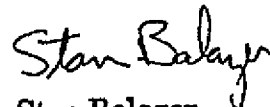

His enthusiastic and unflagging support has consistently helped to make us more comfortable in our relationship with Microsoft, and we wanted to take this opportunity to tell you so.

Thank you!

Regards,

Larry Horsman
General Manager
Distributed Systems Division, San Jose

Stan Balazer
Manager
PC Compatibility

Congratulations, Tim!

Jan
