## Legal Defense Fund

Donations here are for legal defense ONLY  
I checked with my lawyers before setting this up  
See geohot.com

(donations were big success, see this)

Wow, I'm impressed with the response, thanks so much!  
Now I'm confident they won't win this war via attrition :-)  
I will discuss transparency of legal bills with my lawyers.

Yeah. I think this should be easy if everyone donated at least 1\$. 100k people donating 1\$ shouldnt be hard, and 1\$ doesnt make you poor. It's just the number of people that donates that counts. Support this cause, why sue people who did nothing harmful to other people and let free people who kill, abuse childs, and stuff like that?

0 \$ from me because:

1. You are the Julian Assange of hackers who cares too much for press attention
2. Because of you the SHatter bootrom hack was blown (reason probably 1.)
3. You didn't hack the PS3 this time, fail0verflow did but you were just carelss enough to post stuff on your page (reason probably 1.)

In the end you brought yourself in that situation, now stop crying for help and get out of it again... alone!!

Regardless of what you say, Sony is still being babies about the whole things and they are mainly brining things out and blowing them out of proportion. They should have never taken away Other OS. I'll donate as much as I can yo. Keep it up yo, I'm sure you'll do well. People don't seem to see that this whole things is about more than "hacks" and "piracy". Sony is trying to control everything you do w/ a console yo spent your money on.

Geohot, im going to write a new petition to address our freedoms when it comes to the exemptions of circumvention placed in the DMCA and why they protect us and benefit a competitive market. You will be stuck in the california courts for years regarding an issue that can be addressed right now by consulting the anti trust department of justice or congress. We need to get a petition spread that will inform people why our cause is so important to everyone and send it to congress. You will end up having to appeal over and over again, and sony has deep pockets. This is a battle you can not financially afford without the support of the nation. If you are interested in helping me with this, you can contact me through my email to give me a way to talk directly to you. I have already written a petition that is gaining support to the cause. But its ps3 specific, more of a rant, and certain legal discoveries have brought to my attention about a whole new legal approach to this. We need to organize, and gain supporters! This is how i will donate to the cause.

This is the UNITED STATES OF AMERICA...and you've pissed us off.

I am not for piracy. I am FIRMLY against it. I am for my freedoms. I am for my liberties. My grandfather was a Lieutenant Colonel in the US Army Signal Corp. He put his sweat and blood into decrypting things so that we could have our freedoms.

We will continue to do the same.

"Sony is lame, and is suing me for hacking MY OWN PS3" You released the code to do it.

"My PS3 goal has been to provide users a legitimate path to homebrew" yea, you did that, and people used it for evil.

"I had no idea this would happen, and am in full support of the cheaters being permabanned from PSN" So you thought, doing homebrew can only be used for good! Nothing bad can come out!

"I'm a poor college student, what can I do to help?" Well seeing how CFW users can steal other CFW credit card info, why not just steal some credit card numbers?

You really jacked up the whole online experience for some games and it's only going to get worse. Way to go. This is why we can't have nice things, cause of fuckers like you. So what good have you done with this homebrew?

FEBRUARY 19, 2011 10:00 PM

 iosmodifier said...

sorry for this long comment george, but it is needed for all to see.

adapted from <http://iosmodifier.blogspot.com/2011/02/leave-geohot-alone.html>

this post is dedicated to any geohot haters. leave geohot alone. if you don't like him, then you don't like him, but please, keep your comments to yourself. he has never done anything to hurt you, only stuff to help. if it wasn't for him, your iPhone would have most likely never been unlocked. you probably would not even know what a unlock for the iPhone was. i see your comments on his blog posts, i see your comments on his videos. if you have nothing nice to say, don't say it at all.

i started a petition a few days ago, for people to sign if you believe sony was wrong, for starting a lawsuit against geohot. thanks to the 100+ who have signed it, but it looks like it has slowed down. this is because it is not being advertised anymore. if you wish to advertise it still, you know the link. i still believe in #freegeohot that i created and wish to keep it going. Sony, drop the lawsuit, you know your roll, stick to it and leave geohot alone. maybe give him a record deal?

i had more to say, but this pretty much sums it up in a short post.

remember, nothing is official from geohot, unless verified on geohot.com

sigh, people that think geohot ruined the ps3 online are sooooo naive.

1. Sony took away otherOS pissing off fail0verflow, thats kinda is geohots fault but he had no idea they would take such a drastic step as that.
2. Fail0verflow released the algorithm and the vulnerability. Anybody could have figured out the key codes, and i guarantee you there were probably people that already had them and were going to release. its just geohot released his first.
3. Sony fucked up their own systems security, and were cocky about how they couldnt be hacked. Ooooooops.
4. If we didnt hack the ps3, we wouldnt know that our credit info is exposed.

But who cares about your credit info when your k/d ratio is at stake right? because we all know thats how you going to pull some bitches. lol ice-t

If this is not about personal legal trouble, then come back to jailbreak and unlock scene for Apple products. This is not only about Sony, but also Apple stuff, etc. [iphonejtag.blogspot.com](http://iphonejtag.blogspot.com) is still closed anyway...

i hope you lose and go so far into debt that you can't pay for shit you did ruin online play for many people cause you release the codes why you did that cause your a media whore.

This isn't about Sony trying to bully him. They're trying to protect their investment and of course he's the fall guy. He's getting what he deserves for being such an attention whore, if you want to hack things, great, more power to you. But it's a risky game, especially when you mess with companies that have more coin than Scrooge McDuck. The moral here is, if you're going to be a hacker, be anonymous. Don't try to be a celebrity because you might become an example. Geohot is that example; Sony is going to ruin him. Everyone knows this except him, he should have kept playing with iPhones.

people that contributed in your getting caught and being so open about your exploits. Your mind is a gift that was givin' you. I know you have a right to do whatever you want with it. I am personally glad you hooked us all up and shared the knowledge but after apple you kind of built up a imaginary bulletproof vest in your head. Things like twitter came along and made it easier for you to network but at a price. Anyone can see what you post. Making that Rap video was just the wrong thing to do. If you get out of this mess, I'll still continue to follow you because...well... "I ain't no saint." Just as a suggestion, lose the media tie and go underground and use anonymous outlets to push your work.

Well piracy exists and will not disappear... Besides the things said and done, people worldwide continues to buy the products because someone figured out how to jailbreak the ps3 or an iPhone and both Apple and Sony sells tons of iPhones iPads ps3 ps2 psp bad for business maybe but not totally cos several hackers when discovered are employed by them to find future security breach ... I believe that if Steve Jobs wanted to block iPhones jailbroken worldwide when everytime someone connects to iTunes lot of iPhone users started to cry wolf they tolerate it cos depends from us to buy their products.

I agree with your fight against sony on the ps3 issue and if you had no way to get funds this would be a great way to raise them. But you have in your hands the power to raise all the money you need to fight this and then some. what am I talking about ? Simple release unlock for baseband 02.10.04 at \$ 5.00 a pop. Thats right you have had people sweating ( me included ) the release of this unlock since october. Read the Blogs and comments people have been putting out there about this release. People are pissed, and they beg you to release. If you really cared about the people who are affected by this then you would do what ever you had too to raise the money you need even if it ment the release of an unlock earllyer than you wanted too!!!! I for one, and I'm sure meny others would be more than willing to give up the \$ 5, \$10 buck for the unlock insted of getting our dorks pulled about the possible release of this unlock in the future. Me personaly I would be embarrassed asking for donations knowing that I had the means to raise the money I needed to fight this. There's no shame in getting paid for the work that you do even if your a hacker. I know that there are a lot of people out there who would agree with me. And I sure you'll be hearing from these people in the near furture about this issue. How can you expect people to help you know when you have been leading them on about the release of the unlock for baseband 02.10.04 ????? This is food for thought

I thought of you George Hotz how you can win your case against Sony would look

If you remember on ps2 that came out of spring JB sandwich games downloaded from the Internet is the first argument you can present to the "Sony" Until now Sony is not dealt with this issue for what? Still continue to leave games for PS2 and still people bring the games to the Internet Madoasona not take a position here?

Here comes my answer: (I guess) Sony is not taking ways to prevent it because she wants to stop the production of games for PS2 and people will buy the PS3 and it will have a lot of money (we are talking about billions of millions of dollars)

So this is a pretty good argument not like that?:) Now about the donations I have an idea how you can make money I can insert advertisements in popular sites to add the advertisements would be glad to donate the money you earn is acceptable to you? Do you agree? If you answered yes please email me so I can work for you

For your information mr v I have donated geo 50 euros when the unlock for my 3gs was out. I thought it was better for everyone that instead of paying apple 50 euros more for a factory unlocked iphone, I would donate the money to the genius GEOHOT, who promised to release an unlock on every locked firmware. A year later, and as soon as the 3.1.3 unlock was out(4 months delay), I sold the 3gs and now I have a factory unlocked one. Remember that 370z, the porche and the expensive house geo bought with his well earned donations from us. And now he has to earn his allowance with the unlock. All of you waiting for the unlock, go ahead and donate him and as soon as a new device comes out, geo will leave you hanging with your ps3 because he will move on to the new console. For the jackass comment, I am from Cyprus and in Cyprus we have the largest kind of jackasses in the world (fact). But I prefer being a jackass than a sucker like you. Give him money....yeeeeei. lol. And ask anyone this 'someone I dont know is going to court, If you give him money to win what animal are you?' You will get your answer.

IN CONCLUSION. I am a fan of Geo. His programs are the best. EARN your money for gods sakes.

# GEOHOT GOT SUED

SCEA VS HOTZ

MONDAY, FEBRUARY 21, 2011

## First round of donations is closed

Thank you so so much for all of your help, things are looking up money wise.  
Expect to see a few more lawyers on my responses!  
I have enough to cover my legal fees for the time being.  
And in the absolute worst case scenario, we don't want Sony getting it :-P

For now, **the best thing you can do is spread the word**

Let people know how Sony treats customers  
Let people know Sony would rather sue than be proactive and try to fix the problem  
Let people know about laws like the **DMCA** which stifle innovation, and don't do anything to fix the problems they were created to solve

I will keep this blog updated as the case develops.

SONY, how is this any good for you?!

I will do what ever I can to support GEOHOT in his fight at my location (ISRAEL).  
I will do what ever I can to HOLD any SONY purchase at my location (ISRAEL).

Hackers around the world, Please continue your work on PS3. Sony needs to understand going after individuals is WRONG and will only lead to antagonism!

geohot!! scruce Sony just like they scrued you, have a sitdown with Bill Gates, with his support you could really kick Sonys as to the moon. He was really possitive about XBMC when he saw it he haven't mutch influence in the company anymore so they scrued up his idea. I bet if he gets some security input from you he could help you legally against Sony.

You know the saying My Enemys Enemy is my friend? Go american, Help Bill safely set up a Linux core so we can enjoy XBMC again, this time on the 360. It was ment for xbox and not for Sony PS3 anyway, I hoped for a media player solution for the PS3 but I lost my intrest just like all the hackers. I Bought game because they look great when you have people over but I want a XBMC player that can play everything don't care about games anyway. If your going to help anyone with their security go microsoft, their legal team could really crush the Parasites Sony, and they judge wouldn't dare to take any bribes knowing what resources micrsoft got right now the money they throw at her is easy picking. Admitting all the hearsay evidence a child could se she's either in their pocket or has Alzheimerz. Try to ask her what year it is the next time you se her. Then we know for sure. it feels more and more as a russian trail, meaning she made up her mind already, now she tries to make it the best way she can just to not look to suspicious. Admitting all that hearsay evidence makes her look like she never went to law school. If I write on a Blogg George W Bush Robbed a bank and somebody quotes me will George W be arrested? If she was the judge he absolutely would. I

hate corruption especially when it's this obvious.

I hope for the best anyway she can't change the laws after the fact, and you should appeal, any normal judge would grant it.

It's a shame we can't donate anymore, I hoped to donate some every month just donated 10 bux and wanted donate more when my check arrives the 25th and continue every 25th, please let us donate, just a certain date or something. I Love you for all the great progz I can use from Cydia all thanks to you, it's great not to have to replace the Blu Ray player in the PS 3 to but I will never buy Sony for the rest of my life, maybe except if you JailBreak it to then I buy a used one. But going after you was their greatest mistake your the peoples greatest freedomfighter, I hope you go down in history as the true hero that you are. Remember the founding faders of USA were also railroaded by the brittish, look how that turned out. Don't ever give up we are there to support you and all money we would wasted on Sony crap we rather give to you. You have the people behind you and SONY is the SATAN, never again Sony I go Xbox from now on prefered games on Blu Ray, they seemed more valuable but I still put my xbox games on the harddrive so it doesn't matter, microsoft did this possible for us ages ago and Sony still struggless. I Will try out the Kinect, prefered the PS controller but you can get used to anything, maybe I buy some datel converter or something.

God luck and turn on your PayPal every 25th please

lmao @hornedreapery2k

OK yes maybe geohot has shown a little ego that has pissed off some people. But do not forget that the result of this case has a direct affect on all of us. Also note that this case is going to cost a lot in legal fees! I ask you hornedreapery2k, do you have US\$10,000 you can spare for a trial which is nowhere near finished? Cos this is what it has cost geohot so far, and asking the scene is not begging, geohot is representing all of us so it is only fair that some of us help and donate so that we can all get the result we want, not the draconian result sony want.

George dont know if you got my email, but in the statement sony published they clearly state that using cfw is not illegal, its only illegal if it involves piracy. Hope you use their statement as evidence as they have twisted your words so much.

And you who supports him are most dumbest people. Instead of buying some games you give your own money to this clown for paying his lawyers. Look at yourself. Let me start off by saying I have no qualms with your initial round of hacking. What bothers me is your general attitude towards the court case. Simply put, you need to learn to shut the fuck up when it comes to your case. Even a fool could tell that you're digging yourself into a deeper hole every time you make some stupid YouTube video about your case. The mere concept that people would trust you with their money so you can pull stupid shit like that makes me worry.

Good job I say. It's unfortunate that so many are unable to differentiate the online cheaters from those that would like to use their PS3 for their own legitimate purposes.

I'd be more than happy if sony were to come to the party and facilitate home brew developers, as I'm sure the home-brew community would welcome efforts to secure the remainder of the PS3 ecosystem.

Sony could avoid all of this trouble if they'd get off their paranoid high horse and provide a clear path to re-enabling linux and opening up the possibility of legitimate home-brew development. They could even follow apple's lead and start making a buck out of it in the form of a PSN-AppStore..

As it is, all they've done is lock out otherwise legitimate home brew enthusiasts from continuing to spend their money in the PSN Store, which hurts nobody but themselves.

Geohot, \$ONY started a war since they broke the law by removing one of the best features PS3 had (OTHEROS), they broke the law already and stole our money as well. I paid \$745USD when the first PS3 came in, and now I am so disappointed of what they \$ONY did with their updates. I had my PS3 with CFW and i use it for legal purposes by using emus, and apps. I own my games so the best ones I have I backed them up to keep them like new in their cases. I paid \$ony for the hardware, so they have to respect on what we do it !!!!! and besides, yes, \$ony there are some morons that use piracy, but isn't there better ways to detect piracy?? you guys need to learn about microsoft, which in security they are much better than you guys are... Why just don't ban using PSN? because PSN is your server!!! why don't you just ban accounts??? and guess how to detect it?? cheating? relevant EBOOT or CD ID?? there are tons of ways doing that!!!! so \$ony you better watch it cause next time, no one will buy your consoles ever again! and I won't!! hope all the ones in the forum think the same, and then you guys will go to bankruptcy and then who will laugh at you?? Sometimes I don't want to have Polish blood in my body...

PS2 My uncle is a lawyer and have huge law office so i ask him about your case and this is his answer " If George make custom firmware and don't earn money(sell,rent etc) that's not a piracy and when u buy a car u can make what u want with this car(tuning mods etc).

PS3

Sony break law with rootkit. When someone steal u car from public parking. U can't install cameras on that parking (that's against law)

PS4 That's all for today and next week i start with polish blog with all bad things about sony and translate your site (not like on www.ps3site.pl) there everything about u is a huge lie(always Geohot is devil and sony is little angel with white wings)

I know this is a little off topic but I browsed through dev\_flash and couldnt help but notice copyright infringement in there. Freetype is dual licensed but the credit is not anywhere in the .pup file if it is used under the Freetype Project license, you have to hunt down such a credit page, but if it is under the other license (GNU General Public License) they are in even worse trouble. Freetype is the least infringing of the two.

```
/dev_flash/sys/external/libfreetype.sprx  
/dev_flash/sys/external/libfreetypeTT.sprx
```

the other is more of a threat to Sony and the only way one would have known is by circumventing the PS3 TPMs and unlocking levels 1 and 2. Sony attempted to keep its illegal usage of libexif from going public by hiding it behind encryption. It too Geohot's jailbreak for me to see this truth. Sony is not angry. Sony is scared and guilty. libexif is under the GNU Lesser Public License which says that the source code CANNOT be denied to the end user even from derivative works and that anything that uses it must have a copy of the LGPL license agreement with it. I have yet to have found such a thing in ANY of Sony's documentation ANYWHERE and btw, there are multiple copies of this library in dev\_flash. if the FSF knew of this, Sony would get sued.

```
/dev_flash/sys/external/libexif.sprx  
(forgot where the other one is, the folder name has something to do with data)
```

libfreetype is a vector font rendering library while libexif is used to get misc. data from jpeg images taken by a digital camera, both are open source software.

Geohot if you are reading this, please win this case. This isn't the first time SCEA broke the law.

Man you have a great talent inside but you applied it on the wrong field. I think you know the game devs do a lot of hard work to make a game and wish something from it. They don't develop a game for fun or because they are mad, they do it for feeding themselves because they have to live in this world like you and us. Making a game is not the job a babysitter it takes years of skills ,practice and devotion. It becomes there profession and they choose it to earn there living. What they do they really deserve it.

You may have developed something very great but you should have kept for your self. But you tried to become a celebrity, and yes you have become one. But these are the consequences you faced after it. What you have done to the devs, Sony has done nothing to you at all. So I think you deserve something more than what is going on with you. I will really donate you after you go to the jail, so they really feed you properly, and you leave long. Fu\*\*er.

G, The fight the fight that needs fighting speech comes to my mind. Does anyone remember learning the history of

the company store, slavery, or inherited debt? Laws are fought for, they come and they go. Some survive the test of time others are ignored and many have been long since forgotten. The funniest thing I've read as of late was a reference to the law pertaining to horses that return to the seller after being sold. I was sued once. They were represented by the largest law firm in town. I represented myself and won. The funny thing was; I wanted to loose because of the precedent it would have set. When the Judge started what I call his getting ready to rule speech with a horse-trading story, I couldn't help but feel amused. My recollection of what he said is; "one day i bought a horse, the next day it had died, it appeared to be in good health and there was no explanation from the vet. i could have had it butchered or even stuffed i gave it to the vet school. only rode it twice" There was more to the story, but this is what I remember the most. Go to court, fight the fight and we will keep hacking away.

Well actually thinking about the LGPLv2, I'm not so sure it is a violation, except that they didn't make the source available for download. Libraries linked that are actually GPL and not LGPL are a violation.

It sucks that companies like Sony can use the work of the community, hell half their kernel is BSD, and then give lawsuits back. Now if someone can find some code, even a line, that's GPLv3...

I like what they they did in GPLv3 saying you can implement DRM using GPLed software, but you can't sue people for breaking it...that's how I think the world should be.

There are so many reasons why he is not responsible for the pirates or cheaters but I wont go into any of them and I will simply ask you a few questions. When a madman kills someone with a gun. Is it the shooter's fault or the fault of the gun manufacturer? When a drunk driver kills a mother and child is it the drunk driver's fault or the fault of the maker of the liquor the drunk driver drank? Use your head before you senselessly blame someone that does not deserve to be blamed.

As geohot said, LGPL does allow cross linking between proprietary software and LGPL software but the source code

needs to be provided though it also says that a copy of the LGPL needs to be provided with it as well so that the end user knows what rights it grants. The reason why the LGPL is rarely suggested to be used for libraries is because people have tried to take advantage of the FSF by using it in a way that is unintended by the open source initiative.

Free Software is free as in freedom, not free as in free beer. (as told by the reactos team)

Since people don't seem to understand, I'll quote the relevant section of the LGPLv2

"6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications."

(looks like Sony is trying to do this, but their terms aren't permitting modification. Letting customers replace the library wold probably count for this if they did it, but see below)

"You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License."

(they aren't doing this, but that's easy to fix)

" If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License."

(a little harder to fix. they need to update firmware)

"Also, you must do one of these things:"

(here's the biggie)

"a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)"

(they sure as hell aren't doing this! This would let you replace the library with an exploitable one)

"b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with."

(storing the library on /dev/flash is NOT a suitable shared library mechanism! Again if you could replace this, you could exploit)

"c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution."

(rofl. WRite sony, ask for the source, or a usable binary to relink the lib against?)

"d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place."

(i don't see that on the firmware download site!)

"e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy."

(I sure as hell haven't already got that.)

"For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it."

Gee. I wonder what that is? ;)

Sometimes I think you are too nice for this world, consisting of greed and power. Sony want to destroy your life and make you responsible for their own mistakes, and you can seriously think about shaking their hands at the end of all? I can't understand such an opinion, but maybe your attitude is the key to change this system. I hope Apple looks at Sony and see what happen, when they threat the community and owners. I have tweet and post and spread the words. I find SCEA very inappropriate and nonprofessional solving their mistake in court.

I myself do not own any PS3. I was a big fan of PS2 but PS3 I find it too over power and not doing much. It is not that is a bad console but I left Sony's console because I hate their corporate methodology and strategies.

And as we can see, they do not care about homebrew community and worst, their customers.

Keep it up GeoHotz, I will keep looking your blog for any news.

Keep it up pal, from Panama we support you!
