Subject: Re: java phone

They have been calling me as well.

I don't see any way we can work together and not have it revert to arguments of control. I'm done with Sun (tail between my legs, you were right). They won't be happy when we release our stuff, but we now have a huge alignment with industry, and they are just beginning. While I'm not underestimating their abilities, when folks like DoCoMo tell us they want to dump Sun for us, I'm assuming we have something valuable and good. (DoCoMo is flying in next week).

On a separate note, I need to speak with you re: Korea. LG and Samsung are two of my most difficult partners, extremely aggressive when it comes to competition. They know about each other and have crossed the line several times re: our IP (the Dream design I showed you). We are currently in a small dispute with each, which I'm sure will be resolved diplomatically, but I need to brief you in more detail so you don't walk into a storm in Korea.
